PART I - BUSINESS AND GENERAL INFORMATION

Item 1. Business

a. Overview

Fruititas Holdings, Inc. (“FHI”) serves as the holding company of food and beverage community store and kiosk operators with over 30 active brands across its portfolio. As of December 31, 2024, it has established more than 848 stores across the Philippines. The Group serves Philippine consumers daily with fresh fruit shakes and juices, lemonade, coolers, milk tea, desserts, meat-filled pastries, soya-based products, baked goods, and *lechon* (roasted pig), among other products.

FHI traces its roots from Lush Enterprises Corporation (“LEC”), which was incorporated by Mr. Lester Yu in 2000. LEC opened its first “*Fruititas Fresh from Babot’s Farm*” store in 2002 at SM Manila. Fast forward to current year, FHI has more than 848 stores across the Philippines generally located in prime commercial establishments and institutions. Since its establishment, FHI, its Subsidiaries, and other indirect subsidiaries Green Empire International Limited, Oceanic Limited (the “Group”) Lingnam Food Inc., and Bigboks Enterprises Inc. has expanded its brand portfolio to include *Buko Loco*, *Buko ni Fruititas*, *Juice Avenue*, *Johnn Lemon*, *Black Pearl*, *Tea Rex*, *De Original Jamaican Pattie Shop* and *Juice Bar*, *The Mango Farm*, *Babot’s Farm*, *Soy & Bean*, *Balai Pandesal*, *Sabroso Lechon*, *Ling Nam Fried Siopao* and *Ling Nam* since 1950, Mang Bok’s, Big Boks Chik n’ Dips, to name a few. The Group continues to make its mark in the industry through the growth of its store network, expansion through acquisitions, and development of new business concepts and formats.

The Group’s main production facilities are strategically located in Metro Manila, Philippines for more efficient supply chain operations. The Group maintains its own logistics facilities to deliver various materials, supplies, and products to its stores.

The Group considers itself as one of the largest food and beverage community store and kiosk operators in the Philippines. The multiple brands across its portfolio allows it to serve a wide array of products to the local market. The Community store format allows the Group to sell multi-brand products in one roadside location while the kiosk format enables more flexibility and faster expansion. The Group believes its business model is highly scalable, as evidenced by its store network expansion in the past years.

The Group generated total revenues of Php 891.8 million, Php 1,101.7 million, Php 1,799.2 million, Php 2,469.1 million, and Php 2,903.5 million for the years ended December 31, 2020, 2021, 2022, 2023, AND 2024 respectively, and net income (loss) of (Php 48.1) million, (Php 16.3), Php 82.4 million, Php 115.8 million, Php 111.0 million for the same periods.

On November 29, 2019, FRUIT reached another milestone by successfully listing on the Main Board of the Philippine Stock Exchange (PSE) with a total of 2,133,680,000 common shares at ₱1.68 per share.

During the first quarter of 2020, FHI acquired Soykingdom, Inc., manufacturer of soya-based products, and CocoDelivery Inc., a same-day delivery service provider of food and beverage. FHI expanded to 5 subsidiaries including the three kiosk operators namely Fruititasgroup Incorporated, Negril Trading Inc., and Buko Ni Fruititas Inc. In the third quarter of 2020, the Group launched cocodeliveryph.com to provide easier online access to our products and started to open community stores to get closer to the communities of our customers. The Group also strengthened its presence online through social media channels such as Facebook, Instagram, and Viber communities.

2021 marked the entry of FHI to the baked goods industry through the acquisition of Balai Pandesal assets on June by one of its wholly-owned subsidiary, Balai Ni Fruitas Inc. The asset acquisition included initial inventories, technical know-how, equipment and vehicle, trademark, and franchise agreements for five (5) stores. The Balai ni Fruitas Inc. was able to grow the Balai Pandesal store network to 48 community stores as of the end of December 2022 and 58 stores as of end of December 2023, which includes 49 company-owned and 9 franchised stores.

In June 2022, FHI, through its wholly-owned subsidiary, Soykingdom Inc., signed an agreement to acquire, Ling Nam restaurant business in the Philippines through asset and share acquisition.

In March 1, 2023, the final acquisition structure employed by Soykingdom Inc. was to set up a new subsidiary called Lingnam Food Inc. amending the acquisition to acquire only the assets related to the Ling Nam Food Business. The Group completed the acquisition in March 2023 which added the Ling Nam brand to its list of well-loved brands. Ling Nam restaurants are known for its “legacy brand” which was built since 1950’s. The restaurant is known for its delicious, quality and authentic Cantonese dishes such as noodles, congee, and other dim sum products. Ling Nam is also known for its signature Beef Wonton Noodles and other hot and tasty meals serve freshly cooked in its restaurants in Banawe, Quezon City, T. Alonzo, Manila, and San Juan. The Group acquired the trademark, recipes and other technical know-how, leasehold improvements, certain equipment, inventory, among others, from the stores located in San Juan City, Quezon City, and Manila City. The acquisition also includes a land and building located in Caloocan City.

In June 2023, a cloud kitchen concept, Fly Kitchen Inc. was acquired by FHI through purchase of 100% of Outstanding Shares. Fly Kitchen Inc. was founded in 2020 at the height of the COVID-19 pandemic. The business was able to expand into four strategic kitchen locations in Metro Manila, specifically in Makati City, Pasig City, Mandaluyong City, and Quezon City with a combined cooking area of about 200 square meters and cater to over 10 brands, including Hatid Pinoy, Jade Express, Kanin at Sabaw, and more. The business has also developed strong relationships with third-party food aggregators like Foodpanda and Grabfood.

In November 2024, FHI entered the roasted chicken segment, through its wholly-owned subsidiary, Negril Trading Inc. NTI became a 60% shareholder of Bigboks Enterprises Inc., which served as the acquisition vehicle for the assets related to the Mang Bok’s business. Mang Bok’s is a well-loved “ulam” brand of Filipinos. Since its inception in September 2002, it has been catering to Filipinos by offering good-tasting, value-for-money and quality food. Known for its signature Roasted Chicken and Roasted Pork Belly (Liempo), cooked fresh daily to perfection, making every bite juicy, flavorful, and satisfying. The acquisition includes all assets, including inventories, equipment, leasehold improvement, transportation equipment, if any, intellectual property rights/trademark (including brand registrations, know-how, recipes for all past and current products and certain products under research and development of Mang Bok’s, and process/menu manual), franchise ownership grant/rights, contractual rights to suppliers and lessor including security deposits at the time of acquisition.

b. Key Risks

The business and operations of the Group are subject to a number of laws, rules and regulations governing the food and beverage kiosk industry in the Philippines. These laws and regulations impose requirements relating to food manufacturing and storage. In particular, the Group is subject to extensive regulation by the Food and Drug Administration (“FDA”) and local government units (“LGU”), and environmental regulators.

Foodservice businesses are affected by changes in consumer tastes, economic conditions and demographic trends. The timing of product launches, pricing and advertising efforts of competitors may also impact our sales. In the past, we have introduced new products which were unsuccessful and there can be no guarantee that we will be able to introduce new products or new menu items successfully in

the future. If we cannot successfully introduce new products or new menu offerings, our business, financial condition and results of operations could be materially and adversely affected.

The food and beverage kiosk industry in the Philippines is highly competitive with relatively low barriers to entry. As such, there are many well-established foodservices that compete directly and indirectly with us. Our competitors are located domestically. The domestic competitors in the Meat-filled pastry category is *Yumpanada*; in the Buko (Coconut) category are *Louie's Buko*, *Coconut Republic*, *Buko Express Pies & Sweets* and *Buko Juan*; in the Fruit Shakes category are *Fruit Magic*, *Big Chill* and *Thirsty*; in the Juices and Smoothies category are *Islands Juice*, *Pure Nectar*, *Jamba Juice*, *Fruitfull*, *Mooshi Green Bar* and *Tubo Cane Juice*; in the Coolers category is *Zagu*; in the Fries category are *Potato Corner* and *Potato Giant*; in the Lemonade Category are *Simply Lemon* and *Lemon na Bai*. These competitors may not be the only ones in the industry as there can be other major or minor players in each category. If our Group will not be able to compete with them, this could lead to a decline to our businesses affecting our financial conditions and operations.

Our ability to perform on a day-to-day basis is dependent on the capacity and efficiency of our manpower and infrastructure. There may be material interruptions in manpower because of natural calamities or fortuitous events like our employees not being able to go to work because of a typhoon or our vehicles not being able to go to different areas because of floods which can affect our delivery schedule. Moreover, our future sales growth will depend on our ability to acquire or lease strategic land for increase of production capacity and will depend on our ability to acquire or maintain machines that will make production and distribution more efficient. Not being able to capably distribute our product and not being able to acquire or lease strategic land or machines will increase our costs, affecting our capacity to successfully operate daily.

We cannot guarantee that our internal controls and training will be fully effective in preventing all food safety issues at our stores, including any occurrences of foodborne illnesses such as salmonella, E. coli and hepatitis A. In addition, there is no guarantee that our franchised stores will maintain the high levels of internal controls and training we require at our owned stores. Furthermore, we and our franchisees rely on third-party vendors, making it difficult to monitor food safety compliance and increasing the risk that foodborne illness would affect multiple locations rather than a single store. Some foodborne illness incidents could be caused by third-party vendors and transporters outside of our control. New illnesses resistant to our current precautions may develop in the future, or diseases with long incubation periods could arise, that could give rise to claims or allegations on a retroactive basis. One or more instances of foodborne illness in any of our stores or markets or related to food products we sell could negatively affect our store sales nationwide if highly publicized on national media outlets or through social media. This risk exists even if it were later determined illness was wrongly attributed to us or one of our stores. The occurrence of food safety or foodborne illness incident at one or more of our stores, or negative publicity or public speculation about an incident, could materially adversely affect our business, financial condition and results of operations.

The Philippines has experienced a number of major natural catastrophes including typhoons, floods, volcanic eruptions, and earthquakes. In 2017 alone, two (2) major earthquakes struck off the Philippines with a 6.8-magnituded earthquake affecting the Southern region of Mindanao in April and a 6.5- magnitude earthquake affecting Eastern Visayas in July. In October 2013, a 7.2-magnitude earthquake also affected Cebu and the island of Bohol, and in 2013, Super Typhoon Haiyan (called Yolanda in the Philippines) caused destruction, devastation, and casualties of unprecedented levels in Tacloban city, certain parts of Samar, and certain parts of Cebu, all of which are located in the Visayas, the southern part of the Philippines. In January 2020, the Taal volcano erupted and caused destruction in some parts of Batangas and Cavite. The COVID-19 pandemic has also been plaguing the public safety of the whole country. There can be no assurance that the occurrence of such catastrophes or outbreaks will not materially disrupt our operations. We could experience substantial property loss as a result of any such catastrophe and might not be able to rebuild or restore operations in a timely fashion. Our property insurance may not cover all cases of loss of material property. Any such accident could have a material adverse effect on our

business, financial condition, and results of operations.

Item 6. Management's Discussion and Analysis or Plan of Operation.

The following discussion should be read in conjunction with the accompanying consolidated financial statements and notes thereto, which form part of this SEC Form Amended 17-A as "Annex B". The consolidated financial statements and notes thereto have been prepared in accordance with the Philippine Financial Reporting Standards (PFRS).

FY 24 Results of Operations

Key Highlights

FRUIT registered a consolidated net income of Php 111.0 million for the twelve months ending December 31, 2024. This yields a net income margin of 3.8%.

Revenues

As of December 31, 2024, consolidated net revenues, composed of sales from company-owned stores, franchise and royalty fees from franchisees, and revenue from wholly-owned subsidiaries, reached Php 2,903.5 million, increasing by 17.6% from reported revenues of Php 2,469.1 million for the twelve months ending December 31, 2023.

Cost of Sales

For the year ending 2024, consolidated cost of sales increased by 19.3% from Php 975.5 million in 2023 to Php 1,163.9 million.

Consolidated cost of sales is mainly composed of raw material and packaging costs, direct labor costs, and store-related costs including rent, utilities, etc.

Gross Profit

Consolidated gross profit amounted to Php 1,739.5 million for the full year 2024, increasing by 16.5% from Php 1,493.6 million in the previous year. This yielded a gross profit margin of 59.9%, a slight decrease from the 60.5% gross profit in the previous year despite the increasing raw material prices, inflation and other factors.

Selling and Distribution Expenses

For the twelve months ending December 31, 2024, consolidated selling and distribution expenses totaled Php 1,321.7 million, representing a 45.5% cost-to-sales ratio. This is Php 194.3 million higher compared to Php 1,127.4 million during the same period in 2023.

INDEPENDENT AUDITORS' REPORT

The Stockholders and the Board of Directors
FRUITAS HOLDINGS, INC. AND SUBSIDIARIES
No. 60 Cordillera St., Brgy. Dona Josefa
Quezon City, 1113

Opinion

We have audited the consolidated financial statements of FRUITAS HOLDINGS, INC. AND SUBSIDIARIES (a subsidiary of LUSH PROPERTIES, INC.) (the "Group"), which comprise the consolidated statements of financial position as at December 31, 2024 and 2023, and the consolidated statements of comprehensive income, consolidated statements of changes in equity and consolidated statements of cash flows for the years ended December 31, 2024, 2023 and 2022, and notes to consolidated financial statements, including a summary of material accounting policy information.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as at December 31, 2024 and 2023, and its consolidated financial performance and its consolidated cash flows for the years ended December 31, 2024, 2023 and 2022, in accordance with Philippine Financial Reporting Standards (PFRS) Accounting Standards.

Basis for Opinion

We conducted our audits in accordance with Philippine Standards on Auditing (PSA). Our responsibilities under those standards are further described in the *Auditors' Responsibilities for the Audit of the Consolidated Financial Statements* section of our report. We are independent of the Group in accordance with the Code of Ethics for Professional Accountants in the Philippines (Code of Ethics) together with the ethical requirements that are relevant to the audit of the financial statements in the Philippines, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current year. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Impairment Assessment of Intangible Assets

The Group has intangible assets with indefinite useful lives with a carrying amount of ₱259.4 million as at December 31, 2024. This represents 10% of the total consolidated assets as at that date. The Group is required to assess the intangible assets with indefinite useful lives for impairment annually. The impairment assessment of intangible assets is significant to our audit because the assessment process requires significant judgments and estimation relating to assumptions used involving expected future financial performance.

We reviewed the cash flow projections included in the annual impairment assessment. We assessed and tested reasonableness and propriety of the assumptions, methodologies and other data used by comparing these to external and historical data and by analyzing sensitivities in the Group's valuation model. We evaluated cash generating units whether a reasonably possible change in assumptions could cause the carrying amount to exceed its recoverable amount, and assessed the historical accuracy of management's estimates. We also assessed the adequacy of the disclosures in Note 12 to the consolidated financial statements.

Valuation of Investment Properties at Fair Value

The carrying amount of the Group's investment properties amounted to ₱273.2 million as at December 31, 2024. This represents 11% of the Group's consolidated assets as at that date. The net gain from change in fair value of investment properties recognized in the consolidated statements of comprehensive income amounted to ₱6.7 million for the year ended December 31, 2024. The Group engaged the services of an independent firm of appraisers to determine the appraised values of the investment properties.

We considered the valuation of the investment properties at fair value as a key audit matter because the determination of the fair value and the selection of appropriate valuation methodology thereof involve significant judgment and estimation. Our audit procedures included, among others, understanding of the valuation process of the investment properties, evaluation of the appraisal reports prepared by the independent firm of appraisers that support the fair value determination, and review of the underlying assumptions and calculation of the valuation adjustment. We also evaluated the professional qualifications and objectivity of the independent firm of appraisers. Moreover, we reviewed the adequacy of the related disclosures in Note 10 to the consolidated financial statements.

Other Information

Management is responsible for the other information. The other information comprises the information included in SEC Form 20-IS (Definitive Information Statement), SEC Form 17-A and Annual Report for the year ended December 31, 2024, but does not include the consolidated financial statements and our auditors' report thereon. The SEC Form 20-IS (Definitive Information Statement), SEC Form 17-A and Annual Report for the year ended December 31, 2024 are expected to be made available to us after the date of this auditors' report.

Our opinion on the consolidated financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audits of the consolidated financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audits or otherwise appears to be materially misstated.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with PFRS Accounting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

Auditors' Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with PSA will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with PSA, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audits.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditors' report is Cedric M. Caterio.

In May 2024, the Group acquired the assets and the brand name Sugarhouse from Golden Spatula Corporation (GSC) for a total consideration of ₱9.0 million.

On November 19, 2024, the Group subscribed to shares of Bigboks Enterprises Inc., for a total subscription price of ₱8.9 million. The Company paid ₱2.2 million for the said subscription.

Authorization for Issuance

The consolidated financial statements as at December 31, 2024 and 2023 and for the years ended December 31, 2024, 2023 and 2022 were approved and authorized for issuance by the BOD on April 5, 2025, upon review and recommendation for approval by the Audit Committee on the same date.

2. Summary of Material Accounting and Reporting Policies

The material accounting policies used in the presentation of the consolidated financial statements have been consistently applied to all the years presented, unless otherwise stated.

Basis of Preparation and Statement of Compliance

The consolidated financial statements of the Group have been prepared in compliance with Philippine Financial Reporting Standards (PFRS) Accounting Standards. This financial reporting framework includes PFRS Accounting Standards, Philippine Accounting Standards (PAS) and Philippine Interpretation from International Financial Reporting Interpretations Committee issued by the Philippine Financial and Sustainability Reporting Standards Council and adopted by the SEC, including SEC pronouncements.

Bases of Measurement

The consolidated financial statements of the Group have been prepared on a historical cost basis except for financial assets at fair value through profit or loss (FVPL), financial assets at fair value through other comprehensive income (FVOCI), investment properties which are measured at fair value and retirement benefits and lease liabilities measured at present value. The consolidated financial statements are presented in Philippine Peso (Peso), the Group's functional currency. All amounts are rounded to the nearest Peso, unless otherwise indicated.

Historical cost is generally based on the fair value of the consideration given in exchange for an asset and the fair value of the consideration received in exchange for incurring a liability.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The Group uses observable market data to the extent possible when measuring the fair value of an asset or a liability. Fair values are categorized into different levels in a fair value hierarchy based on inputs used in the valuation techniques as follows:

- Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities.

- Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
- Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

If the inputs used to measure the fair value of an asset or a liability might be categorized in different levels of the fair value hierarchy, then the fair value measurement is categorized in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

The Group recognizes transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

Further information about the assumptions used in measuring fair values is included in Notes 10 and 29 to the consolidated financial statements.

Adoption of Amendments to PFRS Accounting Standards

The accounting policies adopted are consistent with those of the previous financial year, except for the adoption of the following amendments to PFRS Accounting Standards effective January 1, 2024 –

- Amendments to PAS 1, *Presentation of Financial Statements - Noncurrent Liabilities with Covenants* – The amendments clarified that covenants to be complied with after the reporting date do not affect the classification of debt as current or noncurrent at the reporting date. Instead, the amendments require the entity to disclose information about these covenants in the notes to the financial statements.

The adoption of the amendments to PFRS Accounting Standards did not materially affect the consolidated financial statements of the Group. Additional disclosures were included in the consolidated financial statements, as applicable.

Amendments to PFRS Accounting Standards in Issue But Not Yet Effective or Adopted

Relevant new and amendments to PFRS Accounting Standards, which are not yet effective as at December 31, 2024 and have not been applied in preparing the financial statements, are summarized below:

Effective for annual periods beginning on or after January 1, 2026:

- Amendments to PFRS 9, *Financial Instruments*, and PFRS 7, *Financial Instruments: Disclosures – Classification and Measurement of Financial Assets* – The amendments clarify that a financial liability is derecognized when the related obligation is discharged, cancelled, expires or otherwise qualifies for derecognition (e.g. settlement date), and introduces a policy option to derecognize financial liabilities settled through an electronic payment system before settlement date if the required conditions are met. The amendments also clarify the assessment of contractual cash flow characteristics of financial assets, the treatment of non-recourse loans and contractually linked instruments, as well as require additional disclosure requirements for financial assets and liabilities with contingent features and equity instruments classified at fair value through other comprehensive income (FVOCI). Earlier application is permitted.

Annual Improvements to PFRS Accounting Standards Volume 11:

- Amendments to PFRS 1, *Hedge Accounting by First-time Adoption of PFRS Accounting Standards* – The amendments update certain language used in PFRS 1 and include cross references to the qualifying criteria for hedge accounting in PFRS 9, Financial Instruments, which are intended to address inconsistencies in certain wordings used between these standards. Earlier application is permitted.
- Amendments to PFRS 7, *Financial Instruments: Disclosures* – The amendments update and remove some obsolete references related to the gain or loss on derecognition on financial assets of an entity that has a continuing involvement and to the disclosure requirements on deferred differences between fair value and transaction price. The amendments also clarify that the illustrative guidance does not necessarily illustrate all the requirements for credit risk disclosure. Earlier application is permitted.
- Amendments to PFRS 9, *Financial Instruments* – Transaction Price and Lessee Derecognition of Lease Liabilities – The amendments clarify that when a lessee has determined that a lease liability has been extinguished in accordance with PFRS 9, the lessee must apply the derecognition criteria for a financial liability which requires recognition of a gain or loss in profit or loss. The amendments also replace the reference to ‘transaction price as defined by PFRS 15, Revenue from Contracts with Customers’ to ‘the amount determined by applying PFRS 15’ to remove potential confusion. Earlier application is permitted.
- Amendments to PAS 7, Statement of Cash Flows - Cost Method – The amendments replace the term ‘cost method’ with ‘at cost’ following the deletion of the definition of ‘cost method’. Earlier application is permitted.

Effective for annual periods beginning on or after January 1, 2027:

- PFRS 18, *Presentation and Disclosure in Financial Statements* – This standard replaces PAS 1, Presentation of Financial Statements, and sets out the requirements for the presentation and disclosure of information to help ensure that the financial statements provide relevant information that faithfully represents the entity’s assets, liabilities, equity, income and expenses. The standard introduces new categories and sub-totals in the statements of comprehensive income, disclosures on management-defined performance measures, and new principles for grouping of information, which the entity needs to apply retrospectively. Earlier application is permitted.
- PFRS 19, *Subsidiaries without Public Accountability: Disclosures* – This standard specifies reduced disclosure requirements that eligible subsidiaries are permitted to apply, instead of the disclosure requirements in other PFRS Accounting Standards. An entity is eligible to apply PFRS 19 when it does not have public accountability and its parent prepares consolidated financial statements available for public use that complies with PFRS Accounting Standards disclosure requirements. Earlier application is permitted.

Under prevailing circumstances, the adoption of the foregoing amendments to PFRS Accounting Standards is not expected to have any material effect on the consolidated financial statements of the Group. Additional disclosures will be included in the consolidated financial statements, as applicable.

Basis of Consolidation

The consolidated financial statements include the accounts of the Parent Company and its subsidiaries.

Subsidiaries

A subsidiary is an entity that is controlled by the Parent Company. A subsidiary is consolidated from the date when control is transferred to the Parent Company directly or through a holding company. Control is achieved when the Parent Company is exposed or has rights to variable returns from its investment with the investee and has the ability to affect those returns through its power over the investee. A subsidiary is deconsolidated from the date when control ceases.

The financial statements of the subsidiaries are prepared for the same reporting year as that of the Parent Company using uniform accounting policies. Significant intercompany transactions and balances, including intercompany profits, dividends and unrealized profits and losses, are eliminated in full.

Non-controlling interests

Non-controlling interests represent the portion of net results and net assets not held by the Parent Company. They are presented in the consolidated statements of financial position within equity, apart from equity attributable to equity holders of the Parent Company and are separately disclosed in the consolidated statements of comprehensive income. Losses within a subsidiary are attributed to the non-controlling interest even if that results in a deficit balance.

A change in ownership interest of a subsidiary, without a change in control, is accounted for as an equity transaction.

If the Parent Company loses control over a subsidiary, the Group: (a) derecognizes the assets and liabilities of the subsidiary; (b) derecognizes the carrying amounts of any non-controlling interest; (c) derecognizes the cumulative translation differences recorded in equity; (d) recognizes the fair value of consideration received; (e) recognizes the fair value of any investment retained; (f) recognizes any surplus or deficit in profit or loss; and (g) reclassifies the Parent Company's share of components previously recognized in other comprehensive income in relation to that subsidiary on same basis as would be required if the Parent Company had directly disposed of the related assets and liabilities.

A change in the ownership interest of a subsidiary, without a change in control, is accounted for as an equity transaction. Upon the loss of control, the Group derecognizes the assets (including goodwill) and liabilities of the subsidiary, any non-controlling interests and the other components of equity related to the subsidiary. Gain or loss arising from the loss of control is recognized in profit or loss. If the Group retains an interest in the previous subsidiary, then such interest is measured at fair value at the date control is lost. Subsequently, it is accounted for as an equity-accounted investee or as financial assets at FVOCI depending on the level of interest retained.

Non-controlling interests represent the interests of minority shareholders of BNFI and BEI.

Business Combination and Goodwill

Business combination is accounted for using the acquisition method. The cost of an acquisition is measured as the aggregate of the consideration transferred, measured at acquisition date fair value, and the amount of any non-controlling interest in the acquiree. Acquisition-related costs incurred are expensed and included in general and administrative expenses.

When the Group acquires a business, it assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date, including the separation of embedded derivatives in host contracts by the acquiree, if any.

Any contingent consideration to be transferred by the acquirer will be recognized at fair value at the acquisition date. Subsequent changes to the fair value of the contingent consideration which is deemed to be an asset or liability will be recognized in accordance with PFRS 9 either in the consolidated statements of comprehensive income or as a change to other comprehensive income. If the contingent consideration is not within the scope of PFRS 9, it is measured in accordance with appropriate PFRS Accounting Standards. Contingent consideration that is classified as equity is not remeasured until it is finally settled and accounted for within equity.

If necessary information, such as the fair value of assets and liabilities acquired, is not available by the end of the reporting period in which the business combination occurs, provisional amounts are used for a period not exceeding one year from the date of acquisition or the measurement period. During this period, provisional amounts recognized for a business combination may be retrospectively adjusted if relevant information has been obtained or becomes available.

The Group also considers whether the acquisition represents an acquisition of a business or a group of assets. The Group accounts for an acquisition as a business if it acquires an integrated set of business processes in addition to the group of assets acquired.

A gain from bargain purchase is generated when the fair value of the net assets acquired by the Group exceeds the acquisition price, and is recognized in the consolidated statements of comprehensive income in the year of acquisition.

Business combination arising from transfers of interest involving entities under common control is accounted for using book values. Any difference between the purchase price and the net assets of acquired entity is presented separately within equity on consolidation. Any non-controlling interest is measured as a proportionate share of the book values of the related assets and liabilities. The acquiree's assets and liabilities are recognized at book values and results of operations are included in the consolidated financial statements as at the date of business combination.

Goodwill acquired in a business combination is initially measured at cost (being the excess of the aggregate of the consideration transferred and the amount recognized for NCI and any previous interest held over the net identifiable assets acquired and liabilities assumed). If the fair value of the net assets acquired is in excess of the aggregate consideration transferred, the Group re-assesses whether it has correctly identified all of the assets acquired and all of the liabilities assumed and reviews the procedures used to measure the amounts to be recognized at the acquisition date. If the reassessment still results in an excess of the fair value of net assets acquired over the aggregate consideration transferred, then the gain is recognized in consolidated statement of comprehensive income.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses.

For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash generating units (CGUs), or group of cash generating units that are expected to benefit from the synergies of the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units or group of units. Each unit or group of units to which the goodwill is so allocated:

- represents the lowest level within the Group at which the goodwill is monitored for internal management purposes; and
- is not larger than an operating segment or determined in accordance with PFRS 8, *Operating Segment*.

Goodwill is tested for impairment annually as at December 31 and when circumstances indicate that the carrying value may be impaired.

Impairment is determined by assessing the recoverable amount of the CGU or group of CGUs, to which the goodwill relates. When the recoverable amount of the CGU or group of CGUs is less than the carrying amount, an impairment loss is recognized. Impairment loss with respect to goodwill cannot be reversed in future periods.

When goodwill has been allocated to a CGU or group of CGUs and part of the operations within the unit is disposed of, the goodwill associated with the operation disposed of is included in the carrying amount of the operation when determining the gain or loss on disposal of operation. Goodwill disposed of in this circumstance is measured based on the relative values of the operation disposed and the portion of the CGU retained.

Financial Assets and Liabilities

Recognition and Measurement

Date of Recognition. The Group recognizes a financial asset or a financial liability in the consolidated statements of financial position when it becomes a party to the contractual provisions of a financial instrument. In the case of a regular way purchase or sale of financial assets, recognition and derecognition, as applicable, is done using settlement date accounting.

Initial Recognition and Measurement. Financial instruments are recognized initially at fair value, which is the fair value of the consideration given (in case of an asset) or received (in case of a liability). The initial measurement of financial instruments is at fair value plus transaction costs, unless it is carried at FVPL, in which case transaction costs are immediately expensed.

"Day 1" Difference. Where the transaction in a non-active market is different from the fair value of other observable current market transactions in the same instrument or based on a valuation technique whose variables include only data from observable market, the Group recognizes the difference between the transaction price and fair value (a "Day 1" difference) in profit or loss. In cases where there is no observable data on inception, the Group deems the transaction price as the best estimate of fair value and recognizes "Day 1" difference in profit or loss when the inputs become observable or when the instrument is derecognized. For each transaction, the Group determines the appropriate method of recognizing the "Day 1" difference.

Classification

The Group classifies its financial assets at initial recognition under the following categories: (a) financial assets at FVPL, (b) financial assets at amortized cost and (c) financial assets at FVOCI. Financial liabilities, on the other hand, are classified as either financial liabilities at FVPL or financial liabilities at amortized cost. The classification of a financial instrument largely depends on the Group's business model and its contractual cash flow characteristics.

As at December 31, 2024 and 2023 the Group has no financial instruments classified as financial liabilities at FVPL.

Financial Assets at Amortized Cost. Financial assets shall be measured at amortized cost if both of the following conditions are met:

- the financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows; and
- the contractual terms of the financial asset give rise, on specified dates, to cash flows that are solely payments of principal and interest on the principal amount outstanding.

After initial recognition, financial assets at amortized cost are subsequently measured at amortized cost using the effective interest method, less allowance for impairment, if any. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees that are an integral part of the effective interest rate. Gains and losses are recognized in profit or loss when the financial assets are derecognized and through amortization process. Financial assets at amortized cost are included under current assets if realizability or collectability is within 12 months after the reporting period. Otherwise, these are classified as noncurrent assets.

As at December 31, 2024 and 2023, the Group's cash and cash equivalents, trade receivables, due from related parties and construction bond (presented under "Other current assets") are classified under this category.

Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash with original maturities of three months or less from dates of placement and which is subject to an insignificant risk of change in value.

Financial Assets at FVPL. Financial assets that do not meet the criteria for being measured at amortized cost or FVOCI are classified under this category. Specifically, financial assets at FVPL include financial assets that are (a) held for trading, (b) designated upon initial recognition at FVPL, or (c) mandatorily required to be measured at fair value.

Financial assets are classified as held for trading if these are acquired for the purpose of selling or repurchasing in the near term. Derivatives, including separated embedded derivatives, are also classified as held for trading unless these are designated as effective hedging instruments. Financial assets with cash flows that are not solely payments of principal and interest are classified and measured at FVPL, irrespective of the business model. Notwithstanding the criteria for debt instruments to be classified at amortized cost or at FVOCI, debt instruments may be designated at FVPL on initial recognition if doing so eliminates, or significantly reduces, an accounting mismatch.

Financial assets at FVPL are measured at fair value at each reporting date, with any fair value gains or losses recognized in profit or loss to the extent these are not part of a designated hedging relationship. The net gain or loss recognized in profit or loss includes any dividend or interest earned on the financial asset and is included in the “Gain (loss) on change in fair value at FVPL” under “Other income (loss)” account in the consolidated statements of comprehensive income.

The Group’s investments in Unit Investment Trust Funds (UITF) which are held for trading are included in this category.

Financial Assets at FVOCI. For debt instruments that meet the contractual cash flow characteristic and are not designated at FVPL under the fair value option, the financial assets shall be measured at FVOCI if both of the following conditions are met:

- the financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows and selling the financial assets; and,
- the contractual terms of the financial asset give rise, on specified dates, to cash flows that are solely payments of principal and interest on the principal amount outstanding.

For equity instruments, the Group may irrevocably designate the financial asset to be measured at FVOCI in case the above conditions are not met.

Financial assets at FVOCI are initially measured at fair value plus transaction costs. After initial recognition, interest income (calculated using the effective interest rate method), foreign currency gains or losses and impairment losses of debt instruments measured at FVOCI are recognized directly in profit or loss. When the financial asset is derecognized, the cumulative gains or losses previously recognized in other comprehensive income are reclassified from equity to profit or loss as a reclassification adjustment.

Dividends from equity instruments held at FVOCI are recognized in profit or loss when the right to receive payment is established, unless the dividend clearly represents a recovery of part of the cost of the investment. Foreign currency gains or losses and unrealized gains or losses from equity instruments are recognized in other comprehensive income and presented in the equity section of the consolidated statements of financial position. These fair value changes are recognized in equity and are not reclassified to profit or loss in subsequent periods.

As at December 31, 2024 and 2023, the Group has classified its investments in club shares as financial assets at FVOCI.

Financial Liabilities at Amortized Cost. Financial liabilities are categorized as financial liabilities at amortized cost when the substance of the contractual arrangement results in the Group having an obligation either to deliver cash or another financial asset to the holder, or to settle the obligation other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of its own equity instruments.

These financial liabilities are initially recognized at fair value less any directly attributable transaction costs. After initial recognition, these financial liabilities are subsequently measured at amortized cost using the effective interest method. Amortized cost is calculated by taking into account any discount or premium on the issue and fees that are an integral part of the effective interest rate. Gains and losses are recognized in profit or loss when the liabilities are derecognized or through the amortization process.

As at December 31, 2024 and 2023, the Group's trade and other payables (excluding nonfinancial liabilities), notes payable, mortgage payable, lease liabilities and security deposits are classified under this category.

Reclassification

The Group reclassifies its financial assets when, and only when, it changes its business model for managing those financial assets. The reclassification is applied prospectively from the first day of the first reporting period following the change in the business model (reclassification date).

For a financial asset reclassified out of the financial assets at amortized cost category to financial assets at FVPL, any gain or loss arising from the difference between the previous amortized cost of the financial asset and fair value is recognized in profit or loss.

For a financial asset reclassified out of the financial assets at amortized cost category to financial assets at FVOCI, any gain or loss arising from a difference between the previous amortized cost of the financial asset and fair value is recognized in other comprehensive income.

For a financial asset reclassified out of the financial assets at FVPL category to financial assets at FVOCI, its fair value at the reclassification date becomes its new gross carrying amount. Meanwhile, for a financial asset reclassified out of the financial assets at FVOCI category to financial assets at FVPL, the cumulative gain or loss previously recognized in other comprehensive income is reclassified from equity to profit or loss as a reclassification adjustment at the reclassification date.

Impairment

The Group records an allowance for expected credit losses (ECL) based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Company expects to receive. The difference is then discounted at an approximation to the asset's original effective interest rate.

For trade receivables, the Group has applied the simplified approach and has calculated ECL based on the lifetime ECL. The Company has established a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

For other financial assets at amortized cost, the Group has applied the general approach and ECL computation is based on the 12-month ECL, which pertains to the portion of lifetime ECL that results from default events on a financial instrument that are possible within 12 months after the reporting date. However, when there has been a significant increase in credit risk since initial recognition, the allowance will be based on the lifetime ECL. When determining whether the credit risk of a financial asset has increased significantly since initial recognition, the Company compares the risk of a default occurring on the financial instrument as at the reporting date with the risk of a default occurring on the financial instrument as at the date of initial recognition and consider reasonable and supportable information, that is available without undue cost or effort, that is indicative of significant increases in credit risk since initial recognition

Derecognition

Financial Assets. A financial asset (or where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognized when:

- the right to receive cash flows from the asset has expired;
- the Group retains the right to receive cash flows from the financial asset, but has assumed an obligation to pay them in full without material delay to a third party under a “pass-through” arrangement; or
- the Group has transferred its right to receive cash flows from the financial asset and either (a) has transferred substantially all the risks and rewards of the asset, or (b) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Group has transferred its right to receive cash flows from a financial asset or has entered into a pass-through arrangement, and has neither transferred nor retained substantially all the risks and rewards of ownership of the financial asset nor transferred control of the financial asset, the financial asset is recognized to the extent of the Group’s continuing involvement in the financial asset. Continuing involvement that takes the form of a guarantee over the transferred financial asset is measured at the lower of the original carrying amount of the financial asset and the maximum amount of consideration that the Group could be required to repay.

Financial Liabilities. A financial liability is derecognized when the obligation under the liability is discharged, cancelled or has expired. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognized in the consolidated statements of comprehensive income.

A modification is considered substantial if the present value of the cash flows under the new terms, including net fees paid or received and discounted using the original effective interest rate, is different by at least 10% from the discounted present value of remaining cash flows of the original liability.

The fair value of the modified financial liability is determined based on its expected cash flows, discounted using the interest rate at which the Group could raise debt with similar terms and conditions in the market. The difference between the carrying amount of the original liability and fair value of the new liability is recognized in the consolidated statements of comprehensive income.

On the other hand, if the difference does not meet the 10% threshold, the original debt is not extinguished but merely modified. In such case, the carrying amount is adjusted by the costs or fees paid or received in the restructuring.

Offsetting

Financial assets and financial liabilities are offset and the net amount is reported in the consolidated statements of financial position if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is intention to settle on a net basis, or to realize the asset and settle the liability simultaneously. This is not generally the case with master netting agreements, and the related assets and liabilities are presented gross in the consolidated statements of financial position.

Classification of Financial Instrument between Liability and Equity

A financial instrument is classified as liability if it provides for a contractual obligation to:

- Deliver cash or another financial asset to another entity;
- Exchange financial assets or financial liabilities with another entity under conditions that are potentially unfavorable to the Group; or
- Satisfy the obligation other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of own equity shares.

If the Group does not have an unconditional right to avoid delivering cash or another financial asset to settle its contractual obligation, the obligation meets the definition of a financial liability.

Merchandise Inventories

Merchandise inventories are carried at the lower of cost and net realizable value (NRV). The cost of merchandise inventories includes all costs of purchase and other costs incurred to bring the merchandise inventories to their present location and condition. The NRV of merchandise inventories is the estimated selling price in the ordinary course of business, less the estimated costs of completion and costs necessary to make the sale. Cost is determined using first-in, first-out method.

At each reporting date, merchandise inventories are assessed for impairment. If merchandise inventories are impaired, the carrying amount is reduced to its NRV. Impairment loss is recognized immediately in profit or loss.

When merchandise inventories are sold, the carrying amount of those merchandise inventories is recognized to profit or loss in the year when the related revenue is recognized.

Deposits and Advance Rentals

Deposits and advance rentals represent payments for security, utilities and other deposits made in relation to the lease agreements entered into by the Group. These are carried at face amounts and will generally be applied as lease payments toward the end of the lease terms. Deposits and advances expected to be realized for no more than 12 months after the financial reporting period are classified as current assets. Otherwise, these are classified as noncurrent assets.

Investment Properties

Investment properties represent a parcel of land, land improvements, and building and building improvements, which are held to earn rental and are not for sale in the ordinary course of business or for administrative purposes.

The investment properties are initially measured at cost. Cost comprises its purchase price, after deducting discounts and rebates, and other directly attributable costs to its working condition and location for its intended use. Subsequent to initial recognition, investment properties are stated at fair value. Any gain or loss resulting from a change in the fair value of the investment properties is recognized in profit or loss as "Gain from change in fair value of investment properties" presented in the consolidated statements of comprehensive income. Fair value is determined by independent appraisers with sufficient experience with respect to both the location and the nature of the investment properties.

Transfers are made to investment properties when, and only when, there is a change in use, evidenced by the end of owner-occupation or commencement of an operating lease to another party or ending of the construction or development. Transfers are made from investment properties when, and only when, there is a change in use, evidenced by the commencement of owner-occupation or commencement of development with a view to sell.

Investment properties are derecognized when either these have been disposed of or when the investment properties are permanently withdrawn from use and no future economic benefit is expected from its disposal. Any gains or losses on the retirement or disposal of investment properties are recognized in profit or loss in the year of retirement or disposal.

For tax purposes, the Group's investment properties are carried at cost less accumulated depreciation computed on a straight-line basis over the estimated useful lives of the investment properties:

Asset Type	Useful Life (in years)
Land improvements	5
Building and building improvements	5 - 20

Property and Equipment

Property and equipment, except for land, are stated at cost less accumulated depreciation and amortization and any impairment in value. Land is stated at cost less impairment in value, if any.

Cost includes expenditure that is directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Expenditures incurred after the property and equipment have been put into operation, such as repairs and maintenance and overhaul costs, are normally charged to operations in the period the costs are incurred. In situations where it can be clearly demonstrated that the expenditures have resulted in an increase in the future economic benefits expected to be obtained from the use of an item of property and equipment beyond its originally assessed standard of performance, the expenditures are capitalized as an additional cost of property and equipment.

Depreciation and amortization are calculated on a straight-line basis over the following estimated useful lives of the property and equipment:

Asset Type	Number of Years
Leasehold improvements	5 years or term of lease, whichever is shorter
Transportation equipment	5-10
Office furniture, fixtures and equipment	2-5
Store furniture, fixtures and equipment	2-5

The estimated useful lives and depreciation and amortization method are reviewed periodically to ensure that the period and method of depreciation and amortization are consistent with the expected pattern of economic benefits for the use of property and equipment.

Fully depreciated and amortized assets are retained in the accounts until these are no longer in use.

When property and equipment are sold or retired, their cost, accumulated depreciation and amortization and any allowance for impairment in value are eliminated and any resulting gain or loss is included in profit or loss.

Intangible Assets

Intangible assets are identifiable non-monetary assets of the Group without physical substance held for use in operations, the production of goods or services and for rental to others. This account includes the following:

Brand Names. The cost of an intangible asset acquired in a business combination is its fair value at the date of acquisition. Subsequently, intangible asset is carried at cost less any accumulated impairment losses.

The Group assessed the useful life of brand names to be indefinite. Based on an analysis of all the relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate cash inflows for the Group.

Brand names with indefinite useful lives are tested for impairment annually, either individually or at the cash-generating unit level. Such intangibles are not amortized. The useful life of an intangible asset with an indefinite life is reviewed annually to determine whether indefinite life assessment continues to be supportable. If not, the change in the useful life assessment from indefinite to finite is made on a prospective basis.

The Relief-from-Royalty method was used in the valuation of the brands. Under this method, the value of an intangible asset is determined by reference to the value of the hypothetical royalty payments that would be saved through owning the asset, as compared with licensing the intangible asset from a third party. The hypothetical royalty payments over the life of the intangible asset are adjusted for tax and discounted to present value at the valuation date. Conceptually, the method may also be viewed as a discounted cash flow method applied to the cash flow that the owner of the intangible asset could receive through licensing the intangible asset to third parties.

Software License. Software license is measured initially at cost, which is the amount of the purchase consideration. Following initial recognition, software license is carried at cost less accumulated amortization and any accumulated impairment losses. The Group's software license has a term of five years and is amortized over such period using the straight-line method.

The useful life and amortization method for software license are reviewed at least at each reporting date. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the software is accounted for by changing the useful life and amortization method, as appropriate, and treated as a change in accounting estimates. The amortization expense on software is recognized in the profit or loss.

Gains or losses arising from the disposal of intangible assets are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in profit or loss when the asset is derecognized.

Impairment of Nonfinancial Assets

The carrying amounts of nonfinancial assets are reviewed for impairment when events or changes in circumstances indicate that the carrying amount may not be recoverable. Brand names and goodwill with indefinite useful lives are tested for impairment annually either individually or at the cash-generating unit level. When the carrying amounts exceed the estimated recoverable amounts, the assets or cash-generating units are written down to their recoverable amounts. The recoverable amount of the asset is the greater of the fair value less cost to sell or value in use. The fair value less cost to sell is the amount obtainable from the sale of an asset in an orderly transaction between market participants less the cost of disposal. In assessing value in use, the estimated future cash flows are discounted to their present value using a pretax discount rate that reflects current market

assessments of the time value of money and the risks specific to the asset. For an asset that does not generate largely independent cash inflows, the recoverable amount is determined for the cash-generating unit to which the asset belongs. Impairment losses are recognized in profit or loss.

An assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the recoverable amount is estimated. A previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. In such instance, the carrying amount of the asset is increased to its recoverable amount. However, that increased amount cannot exceed the carrying amount that would have been determined, net of depreciation and amortization, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in profit or loss. After such reversal, the depreciation and amortization charges are adjusted in future years to allocate the asset's revised carrying amount, on a systematic basis over its remaining useful life.

Operating Segments

The Group operates using different brand names on which operating results are regularly monitored by the chief operating decision-maker (CODM) for the purpose of making decisions regarding resource allocation and performance assessment. The CODM has been identified as the Chief Executive Officer of the Group. However, as permitted by PFRS 8, *Operating Segments*, the Group has aggregated these segments into a single operating segment to which it derives its revenues and incurs expenses as these segments have the same economic characteristics and are similar in the following respects:

- the nature of products and services;
- the nature of production processes;
- the type or class of customer for the products and services; and
- the methods used to distribute their products and services.

Equity

Common Stock. Common stock represents the par value of issued common shares. Unpaid subscriptions are recognized as a reduction from subscribed capital.

Preferred Stock. Preferred shares are voting, cumulative, nonparticipating and nonconvertible and nonredeemable.

Additional Paid-in Capital. Additional paid-in capital represents the excess of proceeds or fair value of consideration received over par value.

Retained Earnings. Retained earnings represent the cumulative balance of the results of operations, net of any dividend declaration.

Dividend Distribution. Dividends are recognized as a liability and deducted from equity when declared by the BOD and the shareholders of the Group. Dividends for the year that are declared after the reporting date are dealt with as an event after the reporting date.

Other Equity Reserves. Other equity reserves arise from business reorganizations within the Group. This represents the difference between the net interest of the Parent Company and the carrying amounts of the assets and liabilities of the combined entities within the Group.

Other Comprehensive Income. This pertains to the cumulative remeasurement gain on the Group's retirement benefits liability arising from experience adjustments and changes in financial assumptions. Remeasurements of retirement benefits liability, and the corresponding deferred tax component, are recognized immediately in other comprehensive loss and are included in equity. These are not reclassified to profit or loss in subsequent periods.

Earnings per Share

Basic earnings per share is calculated by dividing the net income by the weighted average number of common shares outstanding during the year, with retroactive adjustments for any stock dividends declared and stock split.

Diluted earnings per share is computed by adjusting the weighted average number of common shares outstanding to assume conversion of all the potentially dilutive common shares into common shares.

The Parent Company has no potentially dilutive common shares.

Revenue Recognition

Revenue

The Group generates revenue primarily from sale of goods and franchise revenues.

Revenue from Contracts with Customers. Revenue from contracts with customers is recognized when the performance obligation in the contract has been satisfied, either at a point in time or over time. Revenue is recognized over time if one of the following criteria is met: (a) the customer simultaneously receives and consumes the benefits as the Group performs its obligations; (b) the Group's performance creates or enhances an asset that the customer controls as the asset is created or enhanced; or (c) the Group's performance does not create an asset with an alternative use to the Group and the Group has an enforceable right to payment for performance completed to date. Otherwise, revenue is recognized at a point in time.

The Group also assesses its revenue arrangements to determine if it is acting as a principal or as an agent. The Group has assessed that it acts as a principal in all of its revenue sources.

The following specific recognition criteria must also be met before revenue is recognized.

Net Sales. Revenue is recognized, net of sales discounts, at a point in time when the control over the goods has transferred to the customers, which is normally upon delivery to and acceptance of the goods by the buyer.

Franchise Revenue. Revenue from franchisees includes continuing royalty and initial franchise revenues. Royalty fees are recognized in the period earned. Initial franchise revenues are recognized upon opening of a store when the Group has performed substantially all of the performance obligations required under the franchise agreement.

Rental Income. Rental income is recognized on a straight-line basis over the lease term.

Service Fees. Service fees are recognized when the related delivery services are rendered.

Other Sources of Income

Interest Income. Interest income is recognized as it accrues, net of final tax, using the effective interest method.

Dividend Income. Dividend income is recognized when the right to receive the dividend is established.

Other Income. Income from other sources is recognized when earned during the period.

Cost and Expense Recognition

Costs and expenses are recognized in profit or loss when a decrease in future economic benefit related to a decrease in an asset or an increase in a liability has arisen that can be measured reliably.

Direct Costs. Direct costs are costs directly related to the production and sale of goods and are recognized as expense when the related goods are sold or the related services are rendered.

Selling and Distribution Expenses. Selling and distribution expenses constitute costs of selling and distribution of the goods to customers that are not qualified as cost of sales. These are recognized in profit or loss in the period when these are incurred.

General and Administrative Expenses. General and administrative expenses constitute costs of administering the business. These are recognized in profit or loss in the period when these are incurred.

Interest Expense. Interest expense includes interest expense and other finance costs. This is recognized in profit or loss using the effective interest method.

Retirement Benefits

The Group has an unfunded, noncontributory defined benefit plan covering all qualified employees. The retirement benefits cost is determined using the projected unit credit method, which reflects services rendered by employees to the date of valuation and incorporates assumptions concerning employees' projected salaries.

The Group recognizes current service costs and interest expense on the retirement benefits liability in profit or loss.

The Group determines the interest expense on retirement benefits liability by applying the discount rate to the retirement benefits liability at the beginning of the year, taking into account any changes in the liability during the period as a result of benefit payments.

Remeasurements comprising actuarial gains and losses, return on plan assets and any change in the effect of the asset ceiling (excluding interest cost on defined benefits liability) are recognized immediately in consolidated OCI in the period in which they arise. Remeasurements are not reclassified to profit or loss in subsequent periods.

The retirement benefits liability recognized by the Group is the present value of the defined benefits obligation. This is determined by discounting the estimated future cash outflows using risk-free interest rates of government bonds that have terms to maturity approximating the terms of the related retirement benefits liability.

Actuarial valuations are made with sufficient regularity that the amounts recognized in the consolidated financial statements do not differ materially from the amounts that would be determined at the reporting date.

Leases

The Group assesses whether the contracts is, or contains, a lease. To assess whether a contract conveys the right to control the use of an identified assets for a period of time, the Group assesses whether, throughout the period of use, it has both of the following:

- i. the right to obtain substantially all of the economic benefits from the use of the identified asset; and
- ii. the right to direct the use of the identified asset.

If the Group has the right to control the use of an identified asset for only a portion of the term of the contract, the contract contains a lease for that portion of the term.

The Group also assesses whether a contract contains a lease for each potential separate lease component.

The Group as a Lessee. At the commencement date, the Group recognizes ROU assets and lease liabilities for all leases, except for leases with lease terms of 12 months or less (short-term leases) and leases for which the underlying asset is of low value in which case the lease payments associated with those leases are recognized as an expense on a straight-line basis.

ROU Assets. At commencement date, the Group measures ROU assets at cost. The cost comprises:

- i. the amount of the initial measurement of lease liabilities;
- ii. any lease payments made at or before the commencement date less any lease incentives received;
- iii. any initial direct costs; and
- iv. an estimation of costs to be incurred by the Group in dismantling and removing the underlying asset, when applicable.

The ROU assets are recognized at the present value of the liability at the commencement date of the lease, adding any directly attributable costs. After the commencement date, the ROU assets are carried at cost less any accumulated amortization and accumulated impairment losses, and adjusted for any remeasurement of the related lease liabilities. The ROU assets are amortized over the shorter of the lease terms or the useful lives of the underlying assets ranging from three to ten years.

Lease Liabilities. At commencement date, the Group measures a lease liability at the present value of future lease payments using the interest rate implicit in the lease, if that rate can be readily determined. Otherwise, the Group uses its incremental borrowing rate.

Lease payments included in the measurement of a lease liability comprise the following:

- i. fixed payments, including in-substance fixed payments;
- ii. variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
- iii. amounts expected to be payable by the lessee under residual value guarantees; and
- iv. the exercise price under a purchase option that the Group is reasonably certain to exercise; lease payments in an optional renewal period if the Group is reasonably certain to exercise an extension option; and penalties for early termination of a lease unless the Group is reasonably certain not to terminate early.

A lease liability is subsequently measured at amortized cost. Interest on the lease liability and any variable lease payments not included in the measurement of lease liability are recognized in profit or loss unless these are capitalized as costs of another asset. Variable lease payments not included in the measurement of the lease liability are recognized in profit or loss when the event or condition that triggers those payments occurs.

If there is a change in the lease term or if there is a change in the assessment of an option to purchase the underlying asset, the lease liability is remeasured using a revised discount rate considering the revised lease payments on the basis of the revised lease term or reflecting the change in amounts payable under the purchase option. The lease liability is also remeasured using the revised lease payments if there is a change in the amounts expected to be payable under a residual value guarantee or a change in future lease payments resulting from a change in an index or a rate used to determine those payments.

For income tax reporting purposes, payments under operating lease agreements are treated as deductible expense in accordance with the terms of the lease agreements.

The Group as a Lessor. Leases where the Group retains substantially all the risks and benefits of ownership of the asset are classified as operating leases. Initial direct costs incurred in negotiating an operating lease are added to the carrying amount of the leased asset and recognized on a straight-line basis over the lease term on the same basis as rental income. Contingent rents are recognized as revenue in the period in which these are earned.

Income Taxes

Current Tax. Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that have been enacted or substantively enacted as at the reporting date.

Deferred Tax. Deferred tax is provided on all temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred tax liabilities are recognized for all taxable temporary differences. Deferred tax assets are recognized for all deductible temporary differences and carryforward benefits of net operating loss carryover (NOLCO) and minimum corporate income tax (MCIT), to the extent that it is probable that taxable profit will be available against which the deductible temporary differences and carryforward benefits of NOLCO and MCIT can be utilized.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized. Unrecognized deferred tax assets are reassessed at each reporting date and are recognized to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates and tax laws that are expected to apply to the period when the asset is realized or the liability is settled, based on tax rates and tax laws that have been enacted or substantively enacted by the reporting date.

Deferred tax is recognized in profit or loss except to the extent that it relates to items directly recognized in OCI.

Offsetting. Current tax assets and current tax liabilities are offset, or deferred tax assets and deferred tax liabilities are offset if, and only if, an enforceable right exists to set off the amounts and it can be demonstrated without undue cost or effort that the Group plans either to settle on a net basis or to realize the asset and settle the liability simultaneously.

Related Party Relationships and Transactions

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial and operating decisions. This includes: (a) individuals who, owning directly or indirectly through one or more intermediaries, control or are controlled by, or under common control with the Group; (b) associates and, (c) individuals owning, directly or indirectly, an interest in the voting power of the Group that gives them significant influence over the Group and close members of the family of any such individual.

In considering each possible related party relationship, attention is directed to the substance of the relationship and not merely on legal form.

Related party transactions consist of transfers of resources, services or obligations between the Group and its related parties, regardless of whether a price is charged.

Related party transactions are considered material and/or significant if i) these transactions amount to 10% or higher of the Group's total assets or, ii) there are several transactions or a series of transactions over a 12-month period with the same related party amounting to 10% or higher of the Group's total assets. Details of transactions entered into by the Group with related parties are reviewed by independent directors in accordance with the Group's related party transactions policy.

Provisions

Provisions are recognized when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate.

Contingencies

Contingent liabilities are not recognized in the consolidated financial statements. These are disclosed unless the possibility of an outflow of resources embodying economic benefit is remote. Contingent assets are not recognized in the consolidated financial statements but are disclosed when an inflow of economic benefit is probable.

Events after the Reporting Period

Events after the reporting date that provide additional information about the Group's consolidated financial position at the reporting date (adjusting events) are reflected in the consolidated financial statements. Post year-end events that are not adjusting events are disclosed in the notes to consolidated financial statements when material.

3. Significant Accounting Judgments and Estimates

The preparation of the Group's consolidated financial statements requires management to make judgments and estimates that affect the amounts reported in the consolidated financial statements. The judgments and estimates used in the consolidated financial statements are based on management's evaluation of relevant facts and circumstances as at the reporting date.

While the Group believes that the assumptions are reasonable and appropriate, significant differences in the actual experience or significant changes in the assumptions may materially affect the estimated amounts. Actual results could differ from such estimates.

The estimates and underlying assumptions are reviewed on an on-going basis. Changes in accounting estimates are recognized in the period in which the estimate is revised if the change affects only that period or in the period of the change and future periods if the revision affects both current and future periods.

The following are the significant judgments and estimates made by the Group:

Accounting for the Business Acquisition. At the time of acquisition, the Group considers whether the acquisition represents an acquisition of a business or a group of assets. The Group accounts for an acquisition as a business combination if it acquires an integrated set of business processes in addition to the group of assets acquired.

The Group accounts for acquired businesses using the acquisition method of accounting, which requires that the assets acquired and the liabilities assumed are recognized at the date of acquisition based on their respective fair values

Recognizing Gain from Bargain Purchase. As a result of the business combination completed during 2024, the Group recognized a gain from bargain purchase amounting to ₱6.8 million, which is presented under "Other Income" in the consolidated statement of comprehensive income. The gain arose because the fair value of the identifiable net assets acquired exceeded the total consideration transferred.

The application of the acquisition method requires certain estimates and assumptions concerning the determination of the fair values of acquired intangible assets and property and equipment, as well as liabilities assumed at the acquisition date. Moreover, the useful lives of the acquired intangible assets and property and equipment have to be determined. Accordingly, for significant acquisitions, the Group obtains assistance from valuation specialists. The valuations are based on information available at the acquisition date. The Group's acquisitions that have resulted in the recognition of intangible assets with indefinite lives is disclosed in Note 4.

Classifying Operating Segments. The Group is organized into operating segments based on brand names but the Group has aggregated the brand names into a single operating segment as allowed under PFRS 8 due to their similar characteristics. This is evidenced by a consistent range of gross margin across all brand outlets as well as uniformity in sales increase and trending for all outlets, regardless of the brand name (see Note 30). Moreover, all brands have the following business characteristics:

- (a) Similar nature of products/services offered and methods to distribute products and provide services;
- (b) Similar class of target customers; and
- (c) Primary place of operations is in the Philippines.

Classifying Financial Instruments. The Group exercises judgment in classifying a financial instrument, or its component parts, on initial recognition as either a financial asset, a financial liability or an equity instrument in accordance with the substance of the contractual arrangement and the definitions of a financial asset, a financial liability or an equity instrument. The substance of a financial instrument, rather than its legal form, governs its classification in the statements of financial position.

Classifying Lease Commitments - Group as a Lessee. The Group has entered into commercial property leases for its stores. For the Group's non-cancellable lease, the Group recognizes ROU assets and lease liabilities measured at the present value of lease payments to be made over the lease term using the Group's incremental borrowing rate. The Group availed exemption for leases with term of 12 months or less. Accordingly, lease payments on short-term leases are recognized as expense on a straight-line basis over the lease term.

ROU assets and lease liabilities as at December 31, 2024 and 2023 is disclosed in Note 24.

Assessing the ECL of Trade Receivables. The Group estimates ECL using a provision matrix. Depending on the diversity of its debtor's base, the Group uses its historical credit loss experience adjusted for forward-looking factors, as appropriate. The information about the ECL assessment on the Group's trade receivables is disclosed in Note 28 to the consolidated financial statements.

The carrying amounts of the Group's trade receivables as at December 31, 2024 and 2023 are disclosed in Note 7.

Assessing the ECL on Other Financial Assets at Amortized Cost. The Group determines the allowance for ECL using a general approach based on the probability-weighted estimate of the present value of all cash the shortfalls over the expected life of financial assets at amortized cost. ECL is provided for credit losses that result from possible default events within the next 12-months unless there has been a significant increase in credit risk since initial recognition in which case ECL are provided based on lifetime ECL.

When determining if there has been a significant increase in credit risk, the Group considers reasonable and supportable information that is available without undue cost or effort and that is relevant for the particular financial instrument being assessed such as, but not limited to, the following factors:

- Actual or expected external and internal credit rating downgrade;
- Existing or forecasted adverse changes in business, financial or economic conditions; and
- Actual or expected significant adverse changes in the operating results of the borrower.

The Group also considers financial assets that are more than 30 days past due to be the latest point at which lifetime ECL should be recognized unless it can demonstrate that this does not represent a significant risk in credit risk such as when non-payment was an administrative oversight rather than resulting from financial difficulty of the borrower.

No provision for ECL on other financial assets at amortized cost was recognized in 2024, 2023 and 2022. The transactions with respect to these financial assets were entered into by the Group only with reputable banks and companies with good credit standing and relatively low risk of defaults.

The carrying amounts of other financial assets at amortized cost are disclosed in Note 5, 9 and 16.

The fair value of the Group's financial assets at FVPL is disclosed in Note 29.

Estimating the ROU Assets and Lease Liabilities. The Group's ROU assets and lease liabilities are initially measured at the present value of lease payments. In determining the appropriate discount rate, the Group considered readily available interest rate implicit in the lease agreements, interest rate on its borrowings and the term of each lease commitment. The Group determined that the incremental borrowing rate is readily available and presents the appropriate financing cost in leasing the underlying assets. The incremental borrowing rate is the rate that would cause the present value of the lease payments and unguaranteed residual to equal the sum of the fair value of the underlying assets and initial direct costs incurred.

The carrying amounts of ROU assets and lease liabilities as at December 31, 2024 and 2023 are disclosed in Note 24.

Estimating the Fair Value of Investment Properties. Investment properties are measured at fair value. The Group works closely with external qualified appraisers who performed the valuation using appropriate valuation techniques. The appraiser used a valuation technique based on comparable market data adjusted as necessary to reflect the specific assets' location and condition and, estimated expected future cash flows, yields, occupancy rates, discount rates, replacement costs and remaining economic life. The valuation techniques and inputs used in the fair value measurement of investment properties are disclosed in Note 10.

For the purpose of fair value determination and disclosure, the Group determines the nature, characteristics and risks of the investment properties and the level of the fair value hierarchy.

Details of investment properties are disclosed in Note 10.

Assessing the Impairment of Brand Names with Indefinite Useful Life. The Group tests annually whether any impairment in brand names is to be recognized in accordance with the related accounting policy in Note 2. The recoverable amounts of cash-generating units (CGUs) have been determined based on the higher of fair value less costs to sell and value in use calculations, which require the use of estimates. Based on the impairment testing conducted, the recoverable amounts of the CGUs calculated based on value in use as at December 31, 2024 and 2023 are greater than the corresponding carrying amounts of the CGUs as at the same dates.

No impairment loss was recognized in 2024, 2023 and 2022. The carrying amount of brand names as at December 31, 2024 and 2023 is disclosed in Note 12.

Estimating Impairment of Goodwill. The Group determines whether goodwill is impaired at least annually. This requires the estimation of the value in use of the cash-generating units to which the goodwill is allocated. Estimating value in use requires management to make an estimate of the expected future cash flows from the cash-generating units and to choose a suitable discount rate to calculate the present value of cash flows.

The Group recognized impairment loss on goodwill amounting to ₱8.5 million in 2024 (see Note 12).

Assessing the Impairment of Other Nonfinancial Assets. The Group assesses impairment of its nonfinancial assets whenever events or changes in circumstances indicate that the carrying amounts of the assets or group of assets may not be recoverable. The relevant factors that the Group considers in deciding whether to perform an asset impairment review include, among others, the following:

- significant underperformance of a business in relation to expectations;
- significant negative industry or economic trends; and
- significant changes or planned changes in the use of the assets.

No impairment was recognized in 2024, 2023 and 2022. The carrying amounts of deposits and advance rentals, other current assets (excluding construction bond), investment properties, property and equipment, software license and ROU assets are disclosed in Notes 9, 10, 11, 12 and 24, respectively.

4. Accounting for Business Acquisition and Group Reorganization

Brands and Asset Purchase

The Group accounts for acquisitions of assets as an acquisition of a business when the Group acquires an integrated set of business processes in addition to the group of assets acquired.

LNFI

In March 2023, the Group acquired the brand name Lingnam and the related assets from LN Banaue Inc. for a consideration amounting to ₱60.0 million. Under the agreement, the Group acquired the trademark, recipes and other technical know-how, leasehold improvements, certain equipment, inventory, among others, from stores located in San Juan City, Quezon City and Manila. The acquisition also includes land and building located in Caloocan City. Consequently, the business combination resulted in a gain from bargain purchase amounting to ₱24.0 million, as the fair values of the assets acquired exceeded the total consideration by the same amount.

Sugarhouse

In May 2024, the Group acquired the brand name Sugarhouse and the related assets from Golden Spatula Corporation (GSC). The acquisition was completed following the execution of Deeds of Absolute Sale of Assets and the payment of the related consideration amounting to ₱9.0 million.

Under the agreement, the Company acquired the trademark, recipes and other technical know-how relating to Sugarhouse business, leasehold improvements, certain equipment, inventory, among others.

Acquisition of a Subsidiary, Brand and Related Assets

Mang Bok's. On October 28, 2024, the Group subscribed to 960,000 shares, equivalent to 60% ownership interest in Bigboks Enterprises Inc. for a total subscription price of ₱9.0 million. The Company has partially paid ₱2.2 million for the said subscription.

In November 2024, BEI acquired the the brand name Mang Boks and the related assets from Boksbro Inc. for a total consideration amounting to ₱2.0 million. Under the agreement, the Group acquired leasehold improvements, intellectual property, franchise rights and contractual rights.

The following are the fair values of the identifiable assets acquired and the resulting gain as at acquisition date:

	2024		2023
	Sugarhouse	Mang Boks	LNFI
Intangible asset	₱6,247,150	₱1,564,148	₱27,000,000

Gain from bargain purchase	₱5,247,150	₱1,564,148	₱24,000,000

Business Combination

FKI. In June 2023, the Group acquired 100% of the outstanding shares of FKI for a total consideration of ₱14.7 million. The effect of the acquisition initially resulted to a reduction in “other equity reserves” of ₱2.3 million. In 2024, the valuation of the net assets and liabilities of SKI was finalized and the acquisition resulted to a goodwill amounting to ₱18.7 million (see Note 12). As such, the amount of “other equity reserve” was adjusted in 2024.

The following are the fair values of the identifiable net liabilities acquired and the resulting goodwill as at acquisition date:

	Amount
Property and equipment	₱1,679,536
Trade and other receivables	1,395,563
Inventories	877,426
Cash	478,903
Security deposit	26,280
Trade and other payables	(8,471,973)
Fair value of identifiable net liabilities	(4,014,265)
Total consideration	14,680,000
Goodwill	(₱18,694,265)

Equity Transaction Resulting from the Listing of a Subsidiary

In 2021, the common shares of BNFI were listed in the PSE and 325.0 million new common shares were issued at an offer price of ₱0.70 a share in 2021. Expenses incurred during the listing process amounted to ₱23.7 million. This resulted to a decrease in ownership interest of the Parent Company from 100% to 78.26% and the effect is as follows:

Gross proceeds	₱227,500,000
Less expenses charged to APIC of BNFI	20,939,319
Net proceeds	206,560,681
Share of non-controlling interests	(84,779,540)
Other equity reserve	₱121,781,141

On the same day, the Parent Company disposed 87.5 million common shares of BNFI for a total consideration amounting to ₱61.3 million. Thus, further reducing the ownership interest to 72.41% and the effect is as follows:

Net proceeds	₱61,250,000
Share of non-controlling interests	(22,824,067)
Other equity reserve	₱38,425,933

Subsequently in November 2022, the Parent Company acquired ₱37.5 million common shares of BNFI through the PSE for a total consideration of ₱26.5 million. Accordingly, the acquisition increased the ownership interest to 74.92% and the effect is as follows:

Carrying amount of non-controlling interest acquired	₱10,247,458
Acquisition costs	(26,500,000)
Other equity reserve	(₱16,252,542)

The change in the Parent Company's ownership does not result to losing of control. Accordingly, no gain or loss was recognized on the consolidated statements of comprehensive income.

Details of other equity reserves follows:

	2024	2023
Group reorganization

5. Cash and Cash Equivalents

This account consists of:

	2024	2023
Cash on hand	₱17,664,230	₱25,624,552
Cash in banks	427,613,236	445,417,230
Short-term placements	139,992,511	110,531,839
	₱585,269,977	₱581,573,621

Cash in banks earn interest at the prevailing bank deposit rates.

Short-term placements are made for three months depending on the immediate cash requirement of the Group and earn interest at the prevailing short-term placement rates.

Interest income earned is disclosed in Note 23.

6. Financial Assets at FVPL and FVOCI

Financial Assets at FVPL

Investments in unit investment trust funds (UITF) are held for trading. Hence, these have been classified as financial assets at FVPL.

Movements in investments at FVPL are as follows:

	Note	2024	2023
Balance at beginning of year		₱61,316,952	₱61,305,065
Disposals		(16,602,865)	(1,115,720)
Additions		—	2,097,144
Unrealized gain on changes in fair value	23	2,827,932	(969,537)
Balance at end of year		₱47,542,019	₱61,316,952

Dividend income earned amounted to ₱8.9 million and ₱2.1 million in 2024 and 2023 (see Note 23).

Financial Assets at FVOCI

Financial asset at FVOCI pertains to the investment in club shares amounting to ₱1.7 million.

The Group designated its investment in club shares as financial asset at FVOCI because the Group intends to hold this investment for the long term and for strategic purposes. The Group has assessed that the cost of the investment approximates its fair value as at December 31, 2024 and 2023.

7. Trade Receivables

This account consists of:

	2024	2023
Trade receivables	₱113,481,597	₱72,436,597
Less allowance for ECL	3,238,000	3,238,000
	₱110,243,597	₱69,198,597

Trade receivables represent mainly outstanding receivables from franchisees. These are unsecured, noninterest-bearing and are normally collected on a 30-day term.

8. Merchandise Inventories

This account consists of:

	2024	2023
At cost:		
Food and beverages	₱45,710,521	₱39,149,433
Store supplies and others	25,977,799	17,577,588
	₱71,688,320	₱56,727,021

Cost of merchandise inventories charged to “Direct costs” is disclosed in Note 20.

9. Other Current Assets

This account consists of:

	2024	2023
Advances to suppliers	₱35,431,459	₱32,486,510
Construction bond	6,793,747	3,873,626

Prepayments	455,881	4,252,650
	₱60,262,755	₱81,205,186

Advances to suppliers were payments for goods pending delivery as at year-end.

Construction bond is collectible once the improvement is completed and transferred by the Group to the lessor.

Advances to officers and employees pertain to cash advances and are settled through liquidation.

Prepayments mainly consist of insurance, taxes and licenses and advertising.

10. Investment Properties

Fair Value

Land. The fair value of the Group's land is ₱201.8 million and ₱140.1 million as at December 31, 2024 and 2023, respectively. The fair value of the land was determined by an independent property appraiser in 2024 and 2023. The inputs used to determine the market value of the investment properties using the sales comparison approach include location characteristics, size, time element, quality and marketability. Accordingly, the fair value measurement used is classified as Level 3 in 2024 and 2023, respectively.

Land Improvements, Building and Building Improvements. The fair value of land improvements, building and building improvements is categorized under Level 3 using the cost approach wherein the appraised value was based on the cost of constructing an equivalent new structure less depreciation adjustments.

The fair value of the land improvements, building and building improvements was determined by an independent firm of appraisers as at December 31, 2024.

Description of key inputs to valuation on land follows:

Location	Significant unobservable Inputs	Range (weighted average)	
		2024	2023
Sampaloc District, City of Manila	Selling price per square meter	₱163,000/sq. m.	₱154,000/sq. m.
	Value adjustments	4% to 10%	1% to 15%

The significant unobservable inputs to fair valuation are as follows:

Price per square meter: Estimated value prevailing in the real estate market depending on the location, area, shape and time element.

Value adjustments: Adjustments are made to bring the comparative values in approximation to the investment properties taking into account external factors (market conditions, competitiveness, economic condition/demand/growth, time element) and internal factors (location, size/shape/terrain and development).

In valuing the land using sales comparison approach, records of recent sales and offerings of similar land are analyzed and comparisons were made for such factors as size, characteristic of the lot, location, quality and prospective use.

Sensitivity Analysis. Generally, significant increases (decreases) in useful life of assets (excluding land) would result in a significantly higher (lower) fair value measurement. Significant increases (decreases) in factors that contributed in the physical deterioration and all relevant forms of obsolescence in isolation would result in a significantly lower (higher) fair value measurement.

Rental income is disclosed in Note 19. The related direct cost incurred pertains to real property taxes amounting to ₱331,429 in 2024, ₱331,429 in 2023 and ₱213,842 in 2022.

Valuation of Brands

The Relief-from-Royalty method was used in the valuation of the brands. Under this method, the value of brands is determined by reference to the value of the hypothetical royalty payments that would be saved through owning the asset, as compared with licensing the brands from a third party. The hypothetical royalty payments over the life of the brands are adjusted for tax and discounted to present value at the valuation date.

The fair values of the brand names were determined based on a valuation using cash flow projections (value-in-use) covering a five-year period based on long-range plans approved by management. Cash flows beyond the five-year period are extrapolated using a determined constant growth rate to arrive at its terminal value. The growth rates are consistent with the long-term average growth rate for the industry which ranges from 2% to 8%.

The Group used the weighted average cost of capital as the discount rate, which reflected management's estimate of the risk. This is the benchmark used by management to assess operating performance and to evaluate future investment proposals. The recoverable amount of each CGU, calculated using value in use, exceeded the carrying amount of the CGU as at December 31, 2024 and 2023.

Management believes that any reasonably possible change in the key assumptions on which the Group's recoverable amount is based would not result to the Group's carrying amount to exceed its recoverable amount.

Valuation of Goodwill

FKI. In 2023, the Group acquired 100% of the outstanding shares of FKI for a total consideration of ₱14.7 million. The acquisition resulted in the recognition of goodwill amounting to ₱18.7 million (see Note 4).

Goodwill is subject to an annual impairment assessment. The recoverable amounts of this asset have been determined based on a value-in-use calculation using cash flow projections based on financial budgets approved by management. The cash flow projections cover five years, taking into consideration the effect of significant events on the macroeconomic factors used in developing the assumptions. In 2024, the Group recognized impairment of its goodwill amounting to ₱8.5 million.

Sensitivity Analysis. Generally, an increase (decrease) in the incremental after-tax cash flows will result in an increase (decrease) in the fair value of intangible assets. An increase (decrease) in discount rate will result in a decrease (increase) in the fair value of intangible assets.

13. Trade and Other Payables

This account consists of:

	Note	2024	2023

16. Related Party Transactions

The Group, in the normal course of business, has outstanding advances with the Parent Company for working capital amounting to ₱93.1 million and ₱103.6 million as at December 31, 2024 and 2023, respectively. The Group's collections amounted to ₱8.5 million and ₱74.3 million in 2024 and 2023, respectively.

Terms and Conditions of Transactions with Related Parties

Outstanding balances are unsecured, noninterest-bearing and settled in cash upon demand. Management makes an annual assessment of the financial position of the related parties and the market in which the related parties operate. There were no impairment losses recognized in 2024, 2023 and 2022.

Compensation of Key Management Personnel

Compensation of key management personnel, consisting of management fees, salaries, short-term and post-employee benefits amounted to ₱25.4 million, ₱26.6 million, and ₱22.8 million, in 2024, 2023, and 2022, respectively.

17. Retirement Benefits Liability

The Group's retirement plan is unfunded, noncontributory defined benefit plan with a single lump-sum payment covering retirement based on Republic Act No. 7641. The retirement benefits are based on years of service and compensation on the last year of employment as determined by an external actuary using the projected credit unit method. The most recent actuarial valuation was made by an independent actuary as at December 31, 2023.

The table below summarizes the components of retirement benefits cost recognized in the consolidated statements of comprehensive income (see Note 22).

	2024	2023	2022
Current service cost	₱3,648,248	₱3,501,193	₱2,663,431
Interest cost	815,843	723,402	525,110
	₱4,464,091	₱4,224,595	₱3,188,541

Movements in the retirement benefits liability are as follows:

	2024	2023
Balance at beginning of year	₱14,327,522	₱13,897,930
Current service cost	3,648,248	3,501,193
Interest cost	815,843	723,402
Benefits paid	(200,000)	(295,000)
Actuarial gain	—	(3,500,003)
Balance at end of year	₱18,591,613	₱14,327,522

The principal assumptions used in determining the retirement benefits liability as at December 31, 2024 and 2023 are as follows:

	2024	2023
Discount rate	6.12%	6.12%
Future salary increases	3.00%	3.00%

The projected unit credit method was applied to all the benefits without using one-year term cost.

This sensitivity analysis shows the impact of changes in key actuarial assumptions in 2024 and 2023.

	Basis Points	2024	2023
Discount rate	+1%	(P2,631,877)	(P2,227,576)
	-1%	3,287,508	2,797,163
Salary increase rate	+1%	3,150,026	2,940,008
	-1%	(2,485,895)	(2,362,810)

Each sensitivity analysis on the significant actuarial assumptions was prepared by remeasuring the retirement benefits liability at the reporting date after adjusting one of the current assumptions according to the applicable sensitivity increment or decrement (based on changes in the relevant assumption that were reasonably possible at the valuation date) while all other assumptions remain unchanged.

The Group does not maintain a fund for its retirement liability. While funding is not a requirement of the law, there is a risk that the Group may not have the cash if several employees retire within the same year.

The average duration of the retirement benefits liability as at December 31, 2024 is 23.4 years.

Remeasurement Gain

The cumulative remeasurement gain on retirement benefits liability recognized in other comprehensive income in the consolidated statements of financial position as at December 31, 2024 and 2023 are as follows:

	Cumulative Actuarial Gain	Deferred Tax	Net
Balance as at December 31, 2022	P2,441,616	P625,281	P1,816,335
Actuarial gain - Equity holders of the Parent Company	3,441,346	860,336	2,581,010
	2,382,960	610,618	1,772,342
Actuarial gain - Non-controlling interests	58,656	14,663	43,993
Balance as at December 31, 2023 and 2024	2,441,616	625,281	1,816,335
Less non-controlling interests	58,656	14,663	43,993
Equity holders of the Parent Company	P2,382,960	P610,618	P1,772,342

The table below shows the maturity profile of the undiscounted benefit payments:

	2024	2023
Less than five years	₱1,099,708	₱557,471
One year to less than 10 years	4,925,388	5,169,312

Capital Management

The primary objective of the Group's capital management is to ensure that it maintains a strong credit standing and stable capital ratios in order to support its business and maximize shareholder value. The Group maintains its current capital structure and will make adjustments, if necessary, in order to generate a reasonable level of returns to stockholders over the long term. No changes were made in the objectives, policies or processes during the year.

The Group considers the equity presented in the consolidated statements of financial position as its core capital.

The Group manages its capital structure and makes adjustments when there are changes in economic conditions and the requirements of the financial covenants. To maintain or adjust the capital structure, the Group may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares. The Group monitors capital using debt-to-equity ratio, which is total debt divided by total equity.

The debt-to-equity ratios are as follows:

	2024	2023
Total debt	₱858,057,120	₱493,025,958
Total equity	1,725,710,365	1,636,270,023
Debt-to-equity ratio	0.50:1	0.30:1

The public ownership of the Group is 40.75% as at December 31, 2024 and 2023, respectively.

As at December 31, 2024 and 2023, the Company has 121 and 122 stockholders, respectively.

24. Significant Agreements

Group as Lessee - Short-term Lease

The Group entered into several lease agreements with third parties for its store spaces for varying periods of up to one year and renewable annually. The lease contracts for the stores provide for a monthly rental based on a certain percentage of gross sales and a monthly fixed rental or an agreed minimum rental, whichever is higher. Lease agreements are generally renewable through a notice of lease renewal and upon mutual agreement with the lessors.

The advance rentals will be utilized as rental payments for the last two to three months of the lease term amounting to ₱9.9 million and ₱42.2 million as at December 31, 2024 and 2023, respectively.

Rental expense is charged to operations as follows:

	Note	2024	2023	2022
Selling and distribution expenses	21	₱220,369,367	₱203,613,146	₱177,238,124

Group as Lessor

The Group entered into several sublease agreements with third parties for the lease of spaces in food parks for varying periods up to one year.

In 2021, the Group leased out certain commercial spaces of its building to several parties under various noncancellable operating lease agreements with a term of one year to five years, renewable upon mutual agreement by the parties.

Security deposits amounting to ₱635,143 and ₱870,799 as at December 31, 2024 and 2023, respectively, are noninterest-bearing and will be refunded at the end of the lease term.

Rental income is disclosed in Note 19.

Franchise Agreements

The Group has granted its franchisees the right to operate outlets under various brands for acquired periods and subject to the terms and conditions specified in the franchise agreements. The agreements are renewable at the option of the Group. The agreements provide for an initial franchise fee payable upon execution of the agreements. The non-refundable initial franchise fee payment covers the renovation of franchisee's unit, signage, promotional materials and equipment.

Franchise revenue is disclosed in Note 19.

25. Income Taxes

The Group's provision for current income tax in 2024, 2023 and 2022 consists of regular corporate income tax (RCIT) and MCIT.

The details of the Group's deferred tax assets and liabilities are as follows:

	2024	2023
Deferred tax assets:		
MCIT	₱32,449,621	₱36,637,590
NOLCO	25,530,897	15,936,293

28. Financial Instruments Risk Management Objectives and Policies

The Group's financial instruments comprise cash and cash equivalents, financial assets at FVPL, trade receivables, due from related parties, construction bond, trade and other payables (excluding non financial liabilities), notes payable, mortgage payable, lease liabilities and due to related parties. The main purpose of these financial liabilities is to finance the Group's operations.

The Group is exposed to credit risk, interest rate risk and liquidity risk. The Group's management oversees the management of these risks. The Group's BOD reviews and approves policies for managing each of these risks as summarized below.

Credit Risk

Credit risk is the risk that a counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Group is exposed to credit risk from its operating activities and from its deposits with banks and financial institutions.

The table below shows the gross maximum exposure of the Group to credit risk before taking into consideration collateral and other credit enhancements:

	2024	2023
Cash and cash equivalents	₱585,269,977	₱581,573,621
Financial assets at FVPL	47,542,019	61,316,952

	₱844,715,183	₱821,335,242

*Presented under "Other current assets"

The Group deals only with reputable banks and customer to limit this risk. If customers are independently rated, these ratings are used. Otherwise, if there is no independent rating, the Group assesses the credit quality of the customer, taking into account its financial position, past experience and other factors. Individual risk limits are set based on internal or external ratings in accordance with limits set by the management. The compliance with credit limits by customers is regularly monitored by management.

The tables below show the credit quality of financial assets:

The credit quality of such financial assets at amortized cost is managed by the Group using the internal credit quality ratings as follows:

- **High Grade.** Pertains to counterparty who is not expected by the Group to default in settling its obligations, thus credit risk exposure is minimal. This normally includes large prime financial institutions and companies. Credit quality was determined based on the credit standing of the counterparty.
- **Standard Grade.** Other financial assets not belonging to high grade financial assets are included in this category.

Impairment. An impairment analysis is performed at each reporting date using a provision matrix to measure ECL. The provision rates are based on days past due for groupings of various customer segments with similar loss patterns (i.e., by geographical region, product type, customer type and rating, and other forms of credit insurance). The calculation reflects the probability-weighted outcome and reasonable and supportable information that is available at the reporting date about past events, current conditions and forecasts of future economic conditions. Generally, trade receivables are written-off if past due for more than one year and are not subject to enforcement activity.

Trade receivables arise mainly from transactions with its approved franchisees. Franchisees are subject to stringent financial, credit, and legal verification process. In addition, trade receivable balances are monitored on an on-going basis to ensure timely collections. Allowance for expected credit loss for trade receivables amounted to ₱3.2 million as at December 31, 2024 and 2023, respectively. Management assessed that the allowance is sufficient to cover the ECL of trade receivables of the Group.

The Group's franchise agreement provides that in case of breach of agreement which includes significant delay or non-payment of obligations, the franchise will be terminated and the Group will be given the rights to take-over the franchised outlets. Accordingly, this will allow the Group to have the earning rights over the outlets' assets and this credit enhancement allows the Group to reduce its exposure to credit risk.

For other financial assets at amortized cost which is mainly comprised of cash and cash equivalents, due from related parties, and construction bond, the PFRS 9 impairment requirements do not result in significant ECL. The following are considered in the assessment:

- Cash and cash equivalents are deposited with reputable counterparty banks that possess good credit ratings.

- For construction bond and due from related parties, the Group considered the available liquid assets of the related parties and financial capacity of the third party service provider to refund the construction bond once the construction contract is completed.

Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Group's exposure to the risk of changes in market interest rates relates primarily to its note payable and mortgage payable. The Group obtains additional financing through bank borrowings. The Group's policy is to obtain the most favorable interest rates available.

The Group's exposure to the risk of changes in market interest rates relates primarily to the Group's note payable and mortgage payable with variable interest rates as disclosed in Notes 14 and 15, respectively.

The management has assessed that any variation in the interest rate will not have a material impact on the net profit or loss of the Group.

Liquidity Risk

Liquidity risk arises from the possibility that the Group may encounter difficulties in raising funds to meet commitments from financial instruments. It may result from either the inability to sell assets quickly at fair values or failure to collect from counterparty.

The Group's objective is to maintain a balance between continuity of funding and flexibility through bank borrowings and related party advances and aims to manage liquidity as follows:

- To ensure that adequate funding is available at all times;
- To meet commitments as they arise without incurring unnecessary costs; and
- To be able to assess funding when needed at the least possible cost.

The tables below summarize the maturity profile of the Group's financial liabilities based on undiscounted cash flows:

* Excluding statutory payables

The following methods and assumptions were used to estimate the fair values of each class of financial instruments.

Cash and Cash Equivalents, Trade Receivables, Due from Related Parties, Construction Bond, Trade and Other Payables (Excluding Statutory Payables) and Notes Payable. The carrying amounts of these financial instruments approximate their fair values due to the relatively short-term maturity and demand features of these financial instruments.

Financial Assets at FVPL. The fair value of investments at FVPL classified as Level 1 was determined using the quoted market prices as published by the trust company.

Financial Assets at FVOCI. The fair value of investment in club shares designated as financial assets at FVOCI is classified under Level 3 of the fair value hierarchy.

Notes Payable and Mortgage Payable. Fair value is determined based on the discounted cash flow analysis using effective interest rates for similar types of instruments. These financial instruments are classified under Level 2 of the fair value hierarchy groups of the financial statements (significant observable inputs). The rates applied to long-term notes payable and mortgage payable range from 2.42% to 3.76%.

30. Operating Segment Information

For management purposes, the Group is organized into operating segments based on brand names. However, due to the similarity in the economic characteristics, such segments have been aggregated into a single operating segment for external reporting purposes.

Outlet stores sales reflected in the consolidated statements of comprehensive income are all from external customers and within the Philippines, which is the Group's domicile and primary place of operations. Additionally, the Group's noncurrent assets are also primarily acquired, located and used within the Philippines.

Outlet stores sales are attributable to revenue from the general public, which are generated through the Group's store outlets. Consequently, the Group has no concentrations of revenue from a single customer in 2024, 2023 and 2022.

COMPONENTS OF FINANCIAL SOUNDNESS INDICATORS**

The Stockholders and the Board of Directors
FRUITAS HOLDINGS, INC. AND SUBSIDIARIES
No. 60 Cordillera St., Brgy. Dona Josefa
Quezon City, 1113

We have audited in accordance with Philippine Standards on Auditing, the consolidated financial statements of FRUITAS HOLDINGS, INC. and Subsidiaries (the "Group") as at December 31, 2024 and 2023 and for the years ended December 31, 2024, 2023 and 2022, and have issued our report thereon dated April 5, 2025. Our audits were made for the purpose of forming an opinion on the basic consolidated financial statements taken as a whole. The Supplementary Schedule on Financial Soundness Indicators, including their definitions, formulas, calculation, and their appropriateness or usefulness to the intended users, are the responsibility of the Group's management. These financial soundness indicators are not measures of operating performance defined by Philippine Financial Reporting Standards (PFRS) Accounting Standards and may not be comparable to similarly titled measures presented by other companies. This schedule is presented for the purpose of complying with the Revised Securities Regulation Code Rule 68 issued by the Securities and Exchange Commission, and is not a required part of the basic consolidated financial statements prepared in accordance with PFRS Accounting Standards. The components of these financial soundness indicators have been traced to the Group's consolidated financial statements as at December 31, 2024 and 2023 and for the years ended December 31, 2024, 2023 and 2022 and no material exceptions were noted.

Discussion on Impact, Risks, and Management Approach

Fruitas Holdings, Inc. (FHI) began as a single-store operation under Lush Enterprises Corporation (LEC), founded by Mr. Lester Yu in 2000. What started with the launch of Fruitas Fresh from Babot's Farm at SM Manila in 2002 has since expanded into a nationwide network of over 780 stores strategically located in high-footfall commercial areas. Over the years, FHI has strengthened its market presence through organic growth, acquisitions, and business diversification. Its brand portfolio has evolved to include a variety of food and beverage concepts such as Buko Loco, Juice Avenue, Johnn Lemon, Black Pearl, Tea Rex, De Original Jamaican Pattie Shop and Juice Bar, The Mango Farm, Sabroso Lechon, FRUIT Pandesal, Soy & Bean, and Ling Nam. In addition, through its subsidiary Fruitasgroup Incorporated (FGI), FHI operates a food park in Quezon City, further expanding its business model.

The company continues to make a significant impact on the economy by generating employment, sourcing from domestic suppliers, fostering local entrepreneurship, and contributing to economic activity in the food and beverage industry. Its expansion strategy is rooted in identifying profitable locations, optimizing store operations, and launching innovative food service formats.

1. Macro-Environmental Risks in the Philippines

As a company operating in the Philippine market, FHI is exposed to various macro-environmental risks, including political, economic, social, and technological factors. The volatility of the Philippine Peso, rising interest rates, inflationary pressures, and fluctuations in the stock market can impact business costs and consumer purchasing power. Economic downturns can lead to lower consumer spending, affecting revenue performance across FHI's brands. Additionally, political and regulatory changes may influence business operations, while evolving technological trends shape market demand and customer preferences.

To navigate these challenges, FHI continuously monitors macroeconomic trends and engages with key industry stakeholders to stay ahead of regulatory changes. The company adopts a flexible business model that allows it to adjust pricing strategies, supply chain processes, and customer engagement approaches in response to economic shifts. By leveraging digital tools and e-commerce solutions, FHI strengthens its resilience against market uncertainties and ensures business continuity despite external disruptions.

2. Investment Risks in Subsidiaries

FHI derives a significant portion of its revenue from its subsidiaries, which include Fruitasgroup, Inc., Negril Trading, Inc., FRUIT ni Fruitas, Inc., Soykingdom Inc., Cocodelivery Inc., and Flykitchen Inc. The financial health and operational efficiency of these subsidiaries directly impact the overall performance of the company. Any decline in profitability, operational disruptions, or unfavorable market conditions affecting these subsidiaries could lead to lower dividend payouts to FHI, subsequently affecting its financial standing.

To mitigate these risks, FHI takes an active role in overseeing the management and financial performance of its subsidiaries. The company provides strategic guidance to ensure operational excellence, cost efficiency, and market competitiveness. It also continuously evaluates business expansion opportunities and acquisitions to strengthen the

portfolio and drive long-term revenue growth. By optimizing its subsidiaries' performance, FHI enhances its ability to generate sustained value for its shareholders.

3. Financial Risks and Management Strategies

As a holding company, FHI is exposed to financial risks such as liquidity risk, market risk, and interest rate fluctuations. Liquidity risk arises from the challenge of converting subsidiary investments into liquid assets to meet urgent financial obligations. Market risk is influenced by price fluctuations in financial instruments, interest rate changes, and currency exchange rates, which may impact the value of the company's investments. Additionally, interest rate fluctuations can affect the profitability of money market placements and debt securities.

To manage these risks effectively, FHI closely monitors its cash position and maintains sufficient liquidity to ensure the smooth operation of its businesses. The company employs a disciplined approach to financial planning, ensuring it can respond to market changes while safeguarding its investment portfolio. Regular assessments of stock market trends and financial instruments allow FHI to make informed decisions on asset allocation and risk exposure. By adopting a proactive financial risk management strategy, the company reinforces its financial stability and long-term sustainability.

4. Opportunities for Growth

Despite the challenges posed by macroeconomic conditions and financial risks, FHI continues to explore growth opportunities. The company's strong reputation as a food and beverage holding firm, backed by a diverse and profitable brand portfolio, positions it favorably for further expansion. It remains focused on identifying high-growth areas for store openings, pursuing strategic acquisitions, and developing new business concepts that align with evolving consumer trends.

The company is also leveraging advancements in technology to improve customer engagement and streamline operations. Digital transformation initiatives, such as online ordering platforms and delivery services, enhance FHI's market reach and adaptability in the rapidly changing food service industry. By continuously innovating and expanding its business model, FHI is well-positioned to capture emerging opportunities and sustain long-term growth.

5. Climate-Related Risks and Sustainability Considerations

As a holding company, FHI does not have direct exposure to climate-related risks, as its operations primarily involve investments rather than manufacturing or production. However, the company acknowledges the growing importance of sustainability in today's business landscape. While FHI currently does not have a formal climate risk management framework at the corporate level, it recognizes the need for long-term environmental strategies and responsible business practices.

The climate-related policies and sustainability initiatives are implemented at the subsidiary level, where operational activities such as food production, sourcing, and logistics have a direct environmental impact. The Board of Directors actively evaluates potential climate-related risks and opportunities and is considering the adoption of an enterprise risk management program to integrate sustainability into the company's overall strategy.

FHI and its subsidiaries aims to implement eco-friendly initiatives, such as sustainable sourcing of raw materials, waste reduction efforts, and energy-efficient store operations. As the company continues to expand, it remains committed to balancing growth with environmental responsibility.

Discussion of Opportunities

Fruitas Holdings Inc. (FHI) remains committed to identifying and pursuing strategic opportunities to strengthen its presence in the capital market. FHI leverages the consistent profitability of its subsidiaries and the successful integration of past acquisitions to drive growth and enhance shareholder value.

The Company continues to explore potential avenues for expansion, capital raising, and portfolio diversification. These initiatives are aligned with FHI's long-term vision of sustainable growth, operational excellence, and increased market presence across various segments of the food and beverage industry.

Climate-related risks and opportunities

Fruitas Holdings Inc. (FHI) acknowledges that climate change poses both challenges and opportunities for its operations. Extreme weather events, shifting climate patterns, and resource constraints can impact supply chains, raw material sourcing, and store operations. Additionally, evolving environmental regulations may require adjustments in compliance and reporting.

Despite these risks, FHI sees climate change as a catalyst for innovation and improvement. The Company is actively exploring sustainable practices such as energy efficiency, waste reduction, and eco-friendly packaging. It also seeks to collaborate with partners who prioritize sustainability, aligning with growing consumer demand for responsible brands. By embedding climate considerations into its operations, FHI aims to strengthen resilience while contributing to a more sustainable future.

Procurement Practices

Proportion of spending on local suppliers

Disclosure	Quantity	Units

Fruitas Holdings Inc. as a group maintains a strong commitment to supporting local economies through its procurement strategy. In 2024, 100% of the procurement budget for significant locations of operations was spent on local suppliers. This reflects the company's dedication to fostering inclusive and sustainable economic growth by prioritizing partnerships with domestic vendors.

By sourcing entirely from local suppliers, Fruitas not only strengthens supply chain resilience but also promotes community development and reduces its environmental footprint through minimized transportation requirements. This practice aligns with the company's broader sustainability goals and underscores its role as a responsible corporate citizen.

Fruitas continues to evaluate its supplier base to ensure that partnerships are not only locally anchored but also compliant with ethical standards, food safety regulations, and quality benchmarks. The company believes that investing in local enterprises creates shared value, enabling both Fruitas and its suppliers to thrive in a mutually beneficial ecosystem.

Over the years until the end of 2024, the Company did not have any instances of corruption within the organization. Despite the clean record on corruption, the Company will consider to craft a specific program on Anti-corruption within the organization and with business partners to prevent this bad practice from happening.

ENVIRONMENT

Resource Management

FHI's subsidiaries follow best practices in environmental management to manage and mitigate impacts in the environment. They implement waste reduction and proper disposal protocols to minimize adverse effects in their respective territories. Subsidiaries also encourage and welcome ideas and collaborations to further decrease the impact of operations in the environment.

FHI is set to consolidate the data on resource and environmental management of the subsidiaries and will report on these in the succeeding Sustainability Reports.

Energy consumption within the organization:

Disclosure	Quantity	Units	Reduction
Energy consumption (renewable sources)	No Available Information	GJ	-
Energy consumption (gasoline)	No Available Information	GJ	-
Energy consumption (LPG)	5,203.35	KG	-

Energy consumption (electricity)	3,984,960.64	kWh	-

**Consumption data gathered were based on the total payment over average rate per unit. Diesel and Gasoline consumption were consolidated data.*

During the reporting period, Fruitas Holdings Inc. recorded significant energy consumption across its operations. The company used liquefied petroleum gas (LPG), diesel, and electricity as its primary energy sources. The energy consumed from each source was as follows:

- LPG: 5,203.35 kg
- Diesel: 262,473.30 liters
- Electricity: 3,984,960.64 kWh

To better understand its energy footprint, Fruitas converted these quantities into gigajoules (GJ) as follows:

- The 5,203.35 kg of LPG consumed is equivalent to approximately 73.61 GJ.
- The 262,473.30 liters of diesel used is equivalent to approximately 9,051.68 GJ.
- The 3,984,960.64 kWh of electricity consumed is equivalent to approximately 14,347.46 GJ.

This brings the total energy consumption for the reporting period to 23,472.75 GJ.

While Fruitas does not currently utilize renewable energy sources, nor has it tracked gasoline consumption, it remains committed to reducing its environmental impact. The company continues to monitor its energy use and is actively exploring opportunities to integrate renewable energy into its operations moving forward. Additionally, Fruitas is working to enhance its energy efficiency and align with sustainability goals in the future.

SOCIAL

Corporate Social Responsibility

At Fruitas Holdings Inc., Corporate Social Responsibility (CSR) is deeply embedded in its values, with a strong focus on education, community development, and workforce empowerment. In collaboration with its subsidiaries, including FRUIT ni Fruitas Inc., the company continues to build meaningful partnerships and programs that positively impact Filipino communities.

Build A Classroom Project with Hope in a Bottle

Fruitas, together with its subsidiaries, proudly supports the Build a Classroom Project by Hope in a Bottle, a long-standing initiative aimed at enhancing educational infrastructure for students in underserved areas.

As part of this initiative, Fruitas participated in the groundbreaking ceremony for a new classroom on September 23, 2024, with the official opening set for March 18, 2025. The project exemplifies Fruitas' commitment to building brighter futures by ensuring students have access to safe, well-equipped, and conducive learning environments.

Investing in Skills: Workforce Readiness and Technical Training

In line with its mission to empower individuals through employment and continuous development, Fruitas, through FRUIT, has forged strategic partnerships with educational and vocational institutions to support skills development and career readiness.

- In October 2024, Fruitas partnered with the Philippine Business Education (PBE) and USAID to support workforce readiness programs. These aim to equip individuals—especially youth—with essential skills for employment and long-term success in the food and service industries.
- In November 2024, the company expanded its development initiatives through collaborations with Dualtech and TESDA, focusing on technical training and hands-on learning. This effort is designed to close the gap between education and employment, ensuring that employees are equipped with practical skills aligned with industry needs.

Through these impactful initiatives, Fruitas Holdings Inc. reaffirms its dedication to creating a lasting positive impact—not only by serving customers, but by enriching communities, supporting education, and nurturing a competent and empowered workforce.

Manpower for Retail Store Expansion	Luzon, NCR, Visayas and Mindanao	Low-income workers, women, persons with disabilities (PWDs)	N	Right to fair wages, safe working conditions, equal employment opportunities	Provide competitive wages, ensure safe work environments, offer inclusive hiring policies, and provide skills training programs
Sourcing Suppliers from different locations	Laguna, Cavite, Cebu and majority in Metro Manila	Small-scale suppliers, farmers, etc.	N	Fair trade practices	Implement ethical sourcing policies, and provide fair payment terms

**Vulnerable sector includes children and youth, elderly, persons with disabilities, vulnerable women, refugees, migrants, internally displaced persons, people living with HIV and other diseases, solo parents, and the poor or the base of the pyramid (BOP; Class D and E)*

The company's core operations contribute meaningfully to local communities through employment generation and support for small-scale suppliers, creating positive socio-economic impacts beyond its CSR initiatives.

The expansion of retail stores across Luzon, NCR, Visayas, and Mindanao has created job opportunities for low-income workers, women, and persons with disabilities (PWDs). While there are no identified impacts on indigenous peoples, the company supports fair wages, safe working conditions, and equal employment opportunities by offering competitive compensation, inclusive hiring practices, and skills training programs.

Additionally, by sourcing from various local suppliers in Laguna, Cavite, Cebu, and Metro Manila, the company uplifts small-scale suppliers and farmers through the promotion of fair trade practices. These are strengthened through the implementation of ethical sourcing policies and the provision of fair payment terms. Through these efforts, the company ensures that its business operations positively contribute to the development and empowerment of the communities where it operates.

For operations that are affecting IPs, indicate the total number of Free and Prior Informed Consent (FPIC) undergoing consultations and Certification Preconditions (CPs) secured and still operational and provide a copy or link to the certificates if available:

Certificates	Quantity	Units
FPIC process is still undergoing	N/A	#
CP secured	N/A	#

For the reporting period, the company does not have operations that directly affect Indigenous Peoples (IPs). As such, there are no ongoing FPIC consultations and no Certification Preconditions (CPs) have been secured.

Should future operations involve areas inhabited or claimed by IP communities, the company commits to strict compliance with the FPIC process and other legal requirements to uphold the rights and welfare of Indigenous Peoples.

UN SUSTAINABLE DEVELOPMENT GOALS

Product or Service Contribution to UN SDGs

Key products and services and its contribution to sustainable development.

Key Products and Services	Societal Value / Contribution to UN SDGs	Potential Negative Impact of Contribution	Management Approach to Negative Impact
Fresh and healthy food and beverage	FRUIT manufactures and serves fresh and nutritious products, supporting SDG 2 (Zero Hunger) and SDG 3 (Good Health and Well-being) by promoting healthy eating habits.	Mismanagement of fresh and healthy products may lead to food spoilage, contamination, or foodborne illnesses.	FRUIT ensures strict quality control, proper food handling, nutritional transparency, and adherence to food safety standards to maintain product integrity.
Sourcing from local farmers and small-scale suppliers	Supporting local farmers aligns with SDG 8 (Decent Work and Economic Growth) and SDG 12 (Responsible Consumption and Production) by fostering sustainable agriculture and fair trade.	Over-reliance on small suppliers may pose supply chain risks and affect business continuity.	FRUIT diversifies its supplier base, provides capacity-building programs, and implements fair trade policies to strengthen supplier resilience.
Eco-friendly packaging initiatives	Reducing plastic waste contributes to SDG 12 (Responsible Consumption and Production) and SDG 13 (Climate Action) by minimizing environmental impact.	Improper disposal of packaging materials may still contribute to pollution.	FRUIT promotes the use of biodegradable, recyclable, or reusable packaging and educates consumers on proper disposal methods.
Retail store expansion and job creation	Creating job opportunities contributes to SDG 8 (Decent Work and Economic Growth) by providing employment and livelihood for various communities.	Expansion may lead to increased energy consumption and higher carbon footprint.	FRUIT incorporates energy-efficient practices in its stores, implements sustainable building designs, and promotes employee awareness on environmental responsibility.
Digitalization and online ordering platforms	Enhancing customer access to fresh food through digital platforms supports SDG 9 (Industry, Innovation, and Infrastructure) by leveraging technology for better service efficiency.	Increased reliance on technology may contribute to electronic waste and cybersecurity risks.	FRUIT ensures responsible e-waste management, invests in secure IT infrastructure, and implements data privacy safeguards.
